## THE MILFORD TOWN HALL.....A CONTINUING REPORT

For several years now, we have been updating the residents of Milford on the town hall building. In September 1988 monies were allocated for the restoration of this magnificent building via Special Town Meeting. In the spring of 1989, the project began with the temporary relocation of the Ambulance Department, and the sound of the hammers began.....

Overseeing the entire project has been a building committee headed by Marilyn Kenison. This is not a building committee report. CSI (Construction Services Inc.) of Portsmouth was the General Contractor on this project.

On March 17, 1989, bids were opened in the Selectmen's Meeting Room. The lowest bid was higher than authorized funds for the project. The building committee and the architect immediately reviewed the plans seeking modifications that would impact the total project with the least effect, while still leaving a contingency fund. By April 10, 1989, a plan was presented to the Board of Selectmen for their approval. The actual work began on April 14, 1989.

It should be noted that throughout the entire construction project, the town offices continued to occupy the building running the town's business. For nine months, the staff worked under extremely trying conditions, coping with debris, noise, smells, and most certain extremes in climate. The Staff of the Town Hall had no idea what this kind of a project would entail. It has been wondered if such a project were undertaken in the future, would any committee care to exchange places. Not knowing what an adventure would be undertaken for nine months, the staff is to be commended for their sense of humor which was misplaced on several occasions...(we have it back).

However, with the wonderful attitude of CSI and their workers, it was seen through with some semblance of dignity. While the debris piled up, some historic memorabilia was retrieved.

Now, all departments and the Selectmen's Meeting room are housed on the first floor, and the building is handicapped accessible. A magnificent meeting room occupies the second floor. Yankee ingenuity prevailed in this case. We found out that the original floor plans had to be revamped due to budget constraints; the results are that a piece of Milford's history has been preserved. In the DPW area, one of the tin ceilings was preserved also, and the entrance between the main lobby of the hall and the "old court area" is entered through an opening in the brick wall. The brick wall in Louie Aveni's old store still is exposed in the Selectmen's meeting room.

The basement of the building is accessible via Middle Street; and houses the Ambulance, Emergency Management, Welfare Departments, Southern New Hampshire Services, and our Parking Enforcement Officer. Ample storage area has been allocated for archived records.

Up on the third floor, MACC Base is still in residency. the rear of this floor has been brought up to code and left for future expansion.

All in all, 1989 was one adventure after another for the staff of the Town Hall. We wish to thank the residents of Milford for their patience and understanding while our home was receiving its long awaited overhall.

#### Staff - Milford Town Hall

View of the newly renovated "Banquet Hall" on the second floor of the Town Hall. Yes, that is the original floor!

#### TOWN HALL AUDITORIUM RESTORATION COMMITTEE

Within the town appropriation for the project of restoring the Milford Town Hall, there were not funds included to restore the auditorium located on the second floor of the building. The auditorium is the central space that until a few decades ago was a community center used for dances, basketball, lectures, parties, and even, poultry shows. At the Special Town Meeting in 1988, it was the understanding that this auditorium and its entrance would be restored with the funds being raised privately. To accomplish this, THARC, Town Hall Auditorium Restoration Committee has been formed. Its goal is \$267,000.

Contributions from banks, industries, businesses, and individuals now total \$107,000. More is needed; much more. It is hoped that everyone living in Milford, together with people interested in restoring to life, this historic architectural landmark will be generous. Contributions for this project are tax-deductible.

Once the restoration is complete, it is expected that the auditorium will again, become a cultural center for the community, with availability for use extended to all Milford residents. I envision concerts, lectures, meetings, performances, dances. Picture entrance via the oval entrance to the hall with the Civil War Tablets claiming attention on the landing; then the magnificent stairway entrance to the second floor. One can feel history wrapping its arms around one. We can make but one promise this year. That is the promise that work will begin as soon as the end of the fund drive is in sight. We hope to make that promise this year.

THARC

Martha M. Rotch, Chairperson

Town Hall Auditorium as it appears today

## REPORT OF TOWN HALL BUILDING COMMITTEE

The renovation of Town Hall was completed in early February 1990. Architect for the project was David Cheever of Nashua. Construction Services Inc. of Portsmouth was the general contractor.

Bids were opened March 17, 1989. The lowest bid was higher than the funds available for the project. The committee and architect went back to plans to determine where modifications could be made with the least impact to the total project - while still leaving a contingency fund adequate to cover unanticipated findings.

The committee and architect recommended changes to the plan resulting in a total saving of \$72,775.00. (Several items removed at this point were later added back to the project as contingency funds became available).

In general the work proceeded smoothly. It should be noted that throughout construction, town offices continued to occupy the building and run the town's business. For nine months the town hall staff had to cope with noise, dislocation, dust and extremes in temperature. The committee wishes to thank everyone for the way they handled a trying situation and for keeping their sense of humor through it all.

We wish to note our appreciation to CSI and their workers for dealing well with the restraints imposed by an occupied building. Several staff people have told us of the crew's general courtesy and consideration of their presence.

The renovation of town hall has resulted in a building that is safe, comfortable, and efficient while still maintaining the character, charm, and historic integrity of the 118 year old building. Changes were made to the Nashua Street facade to give a more uniform appearance with consistent door and window treatments. Inside, old brick was exposed where it seemed appropriate and original paneling and trim was kept wherever possible. In the Public Works offices we were able to keep original tin ceilings.

All departments and the selectmen's meeting room are housed on the first floor and are accessible to each other. A larger meeting room and serving kitchen are on the second floor, reached via a new stairway or from Middle Street via an elevator. The basement ambulance quarters have been enlarged and improved with bunk rooms, showers, two offices, a kitchen and a function room. The ambulance bays have been refurbished. Also in the basement are offices for welfare department, Southern NH Services, and special police officer. The staff lounge is in the basement as are rooms for archived records, expanded vault area, custodian's office and trash storage. Civil Defense quarters remain in the basement as well. Each level of the public lavatories - four within the building and two entered from Middle Street. The rear third floor area has been brought up to code and left for future expansion. The Milford Communications Center occupies the remaining third floor space.

The project and its circumstances has been no small undertaking. While the appearance and efficiency of Town Hall have certainly been improved, the large bulk of work is not apparent to the public eye. Forty-seven per cent of the budget was spent on completely replacing the building's dangerous electrical and heating systems and adding sprinklers and air conditioning. The attic required more steel reinforcement than anticipated and repairs to the roof were more extensive than originally budgeted.

Although the work went three months beyond schedule, and all contingency money was used, the project was completed within budget. The conditions which forced Milford to embark on a Town Hall project - unsafe, non-code compliant conditions - have been eliminated. Town offices are attractive, comfortable, and workable. One of Milford's most distinctive buildings has been preserved. The committee is satisfied with the results. We hope the town is pleased.

On behalf of the town hall building committee, I thank David Cheever for his complete professionalism and insistence on excellence. David's charm and wit brought us through many tedious moments. He has been gracious and generous to the town of Milford. It has been a pleasure to work with him.

TOWN HALL BUILDING COMMITTEE

## SELECTMEN'S REPORT FOR 1989

For many citizens of Milford and for your Board of Selectmen, 1989 was one of both achievement and aggravation. The areas of achievement could not have been possible without the understanding and vision of the voters. As we meet together at the annual Town Meeting, we can look with pride at the new DPW Facility located on South Street; the safe and beautifully restored Milford Town Hall, and the almost completed Senior Citizens' Housing Project on the site of the old DPW Garage. We would be remiss not to thank the town employees who have worked long and hard to insure that these three projects are successfully completed and a credit to Milford and its citizens.

We had our share of aggravation touching every property owner in this town. This comes in the form of revaluation trauma. It has touched all of us and for many, it has not been a pleasant experience. We continue to find and correct errors in individual property records. We pledge to battle this problem until we, and you, are as satisfied as the law allows. Our Assessing Department stands ready to assist you with questions that you have.

This revaluation experience has taught all of us some valuable lessons. For years, it was the feeling of many voters that we should not expend town funds to accomplish another revaluation as we were all quite comfortable with the work of the State reval of 1972. When the voters finally approved revaluation, many years had elapsed; and the shock of changed values due to a vigorous market caught many taxpayers unprepared. It is our belief that in the future, we will need to undertake frequent efforts to have property values more accurately reflect true and current market values. We would propose do this process " in house " with our Town Assessor, combined with the hiring of some Milford residents to assist. This in lieu of hiring outside firms unable to give Milford quality workmanship. We would like our Assessing Staff for their efforts under this trying and tedious revaluation period.

Another initiative working nicely, thanks to the dedication and concern of Milford households is the recycling program. We have seen as much as 25% of residential waste stream diverted into recycling. This is a very commendable accomplishment, since that percentage is not normally accomplished in recycling programs until the third year of effort. The employees of the recycling contractor, Craig Cassarino, and employees of the Transfer Station have worked hard in assisting residents in this effort. We would like to commend the Transfer Station employees for maintaining such a clean and presentable facility; and for their efforts in scrap metal collection / separation which has resulted in a new source of revenue for Milford. When Governor Gregg visited the site he commented that he rarely has seen such a clean facility. We have had during 1989 a major reduction in the amount of refuse that has come through the gate of the transfer station. Reduction has come primarily from the fact that the major commercial haulers B F I and Waste Management have not taken the appropriate initiative to

recycle the materials that they pick up in town. They have in fact chosen to deliver refuse to locations outside of the Town, primarily to a location in Pennicook. Some of our major commercial and industrial firms have taken initiatives on their own and have viable recycling programs inhouse. They are to be commended. It is the feeling of the Selectmen that the Town should not be in a program that continues to bury trash in the ground. It is for this reason that we are looking favorably to entering into agreements for long term arrangement with a trash to energy firm.

During 1989, a great deal of activity went into activities that will affect the Town in the near future. We therefore, would like to report these to you at this time:

**Bicentennial Committee** - Regular meetings were held this past year under the capable leadership of Selectman Ricciardi. At Town Meeting, you will receive a report on the activities of this committee, including a tentative programme of events planned for Bicentennial week. You will a status report of fund raising activities to date. Say, wasn't our Police Department softball team quite awesome in dispatching all challengers! Better luck in 1990 to most of us.

**Town Hall Auditorium Restoration Committee (THARC)** - This committee is quite diligently seeking corporate, grant, and private monies to restore the Town Hall main (west) entrance, and the entire auditorium area to its former splendor. This venture will cost more than a quarter of a million dollars; we understand that they are about half there. In the fall of 90 the Committee will be holding a Pumpkin Festival on and around the Oval/Town Hall in an attempt to raise funds for this restoration. They will need the help of many people in this effort. Please lend a hand....

**4th of July Committee** - Selectperson Barry and a committee of residents have been meeting regularly to organize an old fashioned family 4th of July extravaganza. This will be a day filled with food, games, sporting events, music and a fantastic fire works display ending the day. There would be no parade, as many other towns have good ones; besides how could one possibly top the magnificent parade highlighting the Labor Day festivities that Milford has had for so many years.

**Fire Whistle** - Hopefully, by the time you are reading this report, you will have heard the little toot that could and did! While the old and decaying fire whistle air tanks were removed during Town Hall renovation, and, a new fire proof record vault built in its place, new air tanks have been added in the attic for the 'little toot.' The whistle is alive and well and well with that familiar sound back in the downtown area.

All in all, it was a positive year for your Board. We are proud to represent you. All of the volunteer boards and committees attempt to do what is in the best interest of the town; keeping within parameters of what the law allows. We would like to thank all of the volunteers who give so much to this town. We know Milford could not operate without them. We also thank our employees who give so unselfishly of themselves in trying to satisfy the needs of the public. Our Town Administrator is fond of saying that public service is an honorable profession, and that it is our duty to help those who come for assistance. Your town hall should be a

place of assistance; and we hope that as a general rule you always find this to be true. There are times when you are unable to find a Selectman, but you can always leave a message, see the Administrator, or any of the staff who stand ready to be of assistance. We wish you well in 1990.  
in 1990.

Respectfully Submitted,

*Richard Mace Sr.*

Congressman Chuck Douglas presenting an American Flag to Rosario Ricciardi in recognition of Milford Town Hall being placed on the National Historic Register.

## MILFORD POLICE DEPARTMENT

The year 1989 proved to be a difficult one for the Milford Police Department. Due to extreme budget restraints we lost an officer to another community; and closed the police station on weekends. Captain Douglas returned to patrol duty. During this particular time, however, we witnessed a dramatic increase in criminal activity which we attribute to the rapid growth of the Milford community.

Milford's Crime Prevention Unit began a program this past year that includes free of charge, surveys done on business and residential security systems. Our officers are comfortable with the receptions received to talks and discussions held within the school system on various subjects including the Officer Bill and Patch the Pony Programs. A minimum of twenty minutes per shift is consumed with foot patrol throughout the downtown and oval areas. We have found that a safer climate appears to be perceived with the foot duty in existence.

The VFW Women's Auxiliary was quite generous to our department with the donation of three flags. We thank them for their generosity. Dave Welch, Electrical MD graciously provided two blue lights one sees at the front of the station; and, James Lambert of Universal Systems Association, Inc. donated a security monitoring system; and David Day of Day Fire Extinguisher Company for the alarm panel for smoke and fire detection coverage. Of course, there is no way we can forget the benevolence of Paul Amato and Scarborough Co. for the donation of the fence which provides us a measure of security at the station. It always amazes me when this community extends its hand in such a generous manner to help us provide public safety to the town.

Promotions this past year were made to Fred Douglas and Paul Conti. Douglas is the Captain of Milford's Police Department, and Conti has been made Detective Lieutenant. No, folks, it was not to keep them available for the pitching staff for the softball team in 1990.

As part of the Bicentennial fund raising effort, the Milford Police Department did indeed show prowess on the softball field. It is hoped that the ball games will become part of our exercise routine for the summer months. I feel certain that a good time was had by all in attendance; and, some monies were raised for Milford's birthday party to take place in 1994.

Fox, our police dog and his handler, Officer Jim Crane graduated from the Boston Police Department's K-9 Narcotics school in 1989.

On behalf of the department, I want to thank the citizens of Milford for their continued support this year. We look forward to serving you in the 90s.

MILFORD POLICE DEPARTMENT

*Steven C. Sexton*  
Steven C. Sexton, Chief

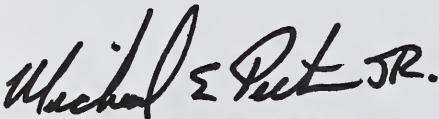

## MILFORD AREA COMMUNICATIONS CENTER

The end of 1989 found Milford Area Communications Center completing its fourth full year as a separate governmental subdivision. The Intermunicipal Agreement which outlines the manner by which our center operates with Amherst, Brookline, Lyndeborough, Milford, Mont Vernon, and Wilton has worked well

During the past year, the staff at MACC Base has worked diligently in order to provide the finest dispatch service for the least amount of money. Changes in scheduling, lighting, insurances, financing, and a host of others areas have resulted in a budget decrease for 1990. While the current telecommunications equipment works well, we still endeavor to enhance radio coverage. In order to allow for the growth experienced by the six towns being served by our center, we have added three new telephone lines to the system.

The consolidation of emergency communications for all six towns has resulted in the most comprehensive and cost effective communications system available. All of our full time dispatchers are attending accredited training programs which are sponsored by various state agencies. With the cooperation of the agencies for whom we dispatch, there have been some changes in procedure and protocol which have facilitated smoother communications.

All of us at the Center look forward to another year of service to all the area department and the residents of the six area towns. On a personal note.....As I enter into my second full year as Communications Center Director, I would like to close this report with my own heartfelt thanks to all of you for your continued support; and, I look forward to serving you in the 90s.

MICHAEL E. PUTNAM  
DIRECTOR OF COMMUNICATIONS

## MILFORD VOLUNTEER AMBULANCE SERVICE

For the members of the Milford Volunteer Ambulance Service, 1989 was a year of transition and growth in the areas of leadership, staffing and operation. In March, the service felt the impact of change when we vacated our "home" and moved to temporary quarters on Mill Street while Town Hall renovations commenced. In September, we moved back in to our new 'home.' There is no question but that we are pleased with this change. In conjunction with the anticipated festivities that will surround a grand open house for the Town Hall, the Service is planning a spring open house in order that Milford residents might have an opportunity to visit our remodeled quarters.

The full time day attendants have become a permanent portion of the service operation. The attendants work four ten-hour days. This leaves Wednesdays, weekends, and nights covered by volunteers. In addition to manning the ambulances, our day crew is available to answer billing questions, insurance inquiries, and completion of forms necessary to submit charges to various agencies. They can be reached at 673-1087.

MVAS members are actively involved in continuing education and skill advancement courses. Presently our roster includes 4 Advanced First Aiders, 16 Emergency Medical Technicians, and 10 EMT-Intermediates. Milford Ambulance has the highest number of EMT-Intermediates for any volunteer service in the area. An EMT-I may administer intravenous fluids and other advanced skills to stabilize a patient prior to reaching a hospital. An EMT must complete and pass an intense training program in emergency medicine. Six attendants attained this skill level in 1989. Advanced First Aid is required to obtain a state ambulance attendant license. These dedicated people give freely of their time, energy and emotion in order to provide Milford with one of the best squads in the state.

Another unique facet of our service is that we sponsor a Boy Scout Explorer Post comprised of students between the ages of 15 and 21 who are interested in the medical field. These students are trained as Advanced First Aid providers. They ride and train with service members.

With generous donations, MVAS has been able to acquire medical equipment, and partially furnish our new quarters. The acquisition of two defibrillation units have improved our pre-hospital emergency care to patients in heart distress. Fifteen of our members are certified as EMT-Defibrillation providers.

Our 1979 ambulance was used in trade for the acquisition of a new diesel ambulance which sports the true colors of the Service which are blue and white. We also said good-bye to long-time members, David Turner, David Richardson, and Andrea Potter. MVAS is proud to have had you as members and we wish you well in your future endeavors.

In retrospect, 1989 was an exciting and busy year for all of us on the service. We would like to thank our families for their continued support as we respond to the needs of others. For the past and now for the future, we are "HERE FOR LIFE."

#### MVAS DIRECTORS

*Robert Thompson*

Robert Thompson, Chairman

#### EMERGENCY MANAGEMENT

On behalf of the Milford Emergency Management, I am pleased to give a report on the accomplishments of my team for 1989. To begin with your Emergency Management Department now has a total of ten (10) volunteer members who unquestionably give their time and effort whenever and wherever needed.

We began 1989 by renovating the small center that we call home. We are most proud of the fact that this project was completed at no cost to the taxpayer. Every area was renovated through volunteer help, and, personal financing from the EM crew.

Milford EM group participated in a nationwide CIVEX drill. I am proud to state that Milford was rated as one of the top departments in the entire state. We also staged a Mock Disaster Drill which is requested of all EM groups statewide. In the fall, We involved the other life, safety organizations in town; namely, Police, Ambulance, and Fire Departments; and, the State Emergency Management Office in a surprise disaster. It was a complete success! A MDD is designed to illustrate the effectiveness of coordinating all emergency and other service groups of a community in a disaster situation. I am proud of the improvement of the Emergency Management Department in the past year. The membership and I are looking forward to further advancement of our training; and anticipate an even greater report on improvement in the coming year.

*David B. Boissonault*

DAVID B. BOISSONAUT, DIRECTOR

## FIRE DEPARTMENT

As with all other life safety organizations, Milford Fire Department responded to a greater number of incidents in 1989. This increase in activity, and the general state of the economy has begun to create a lower manpower response during the daytime hours. Fire service to the Town of Milford is done on a volunteer basis. Our men are finding it more difficult to leave their place of employment as the number of incidents increase. We have found the basic explanation for this is that employers are requiring more production to keep overhead costs down. The resulting impact is seen in the turnover rate in our department. The goal of the Milford Fire Fighters is to remain a call department.

The members of this department thank the many individuals and business concerns who have provided us with support during 1989. As has become traditional, Violette's IGA and McDonald's head the list. To Ron Violette, who retired this past December, we can never find enough words with which to thank you! The Board of Firewards and I thank the men of this department for their dedication. We also thank those employers who allow these men to leave their jobs when a fire call comes in. If it were not for this support, we would not be able to keep the goal of this department as a realistic one. We would have to alter the structure of our organization to allow for permanent "employees." You, the townspeople, can be proud of the professional manner in which your Call Department conducts itself.

Continuous training of members remains an important aspect. Company drills are held monthly. Full department drills are held quarterly. Rescue drills take two nights a month. All new members are required to take Certified I training within one year of joining; and a Basic Rescue Course within two years. At present, 74% of Milford's Fire Department are at Certified Level I. Several of our men have completed courses in Levels II and III. Two of our men have successfully completed Career I; and we are pleased that five men have enrolled in this training course.

Patricia Warren will be a name contributed to the history of the Town by the fire department. Ms. Warren became the first woman member of Milford Fire Department in February 1989. As a recruit, she was required to participate in all aspects of departmental training, which she did with what appeared to be a minimum of effort. We lost Elizabeth in December when she moved to a neighboring community. Engine #63 will always have a spot in Milford's history.

After serving 30 years, Lt. Dean Merrill, member of Engine #61 retired in 1989. We will miss Dean very much.

1989 saw several changes for the fire department with some of them meeting a bit of resistance. The alarm regulation which was enacted at a previous town meeting was put fully into force. It has helped to reduce the number of false alarms requiring response. All

residential buildings with two or more units, business, industrial, and commercial units with smoke detectors and/or fire alarm systems are required to register same with the Milford Fire Department. Enforcement of the alarm regulation has brought about newer or updated systems and a keener awareness of the safety factors associated with them.

A Knox Box System introduced in 1988 continues to grow as more and more boxes are installed within the community. A Knox Box is a small security vault mounted on the outside of a building for use by this department. Information is readily available at the fire station.

During 1989 the State of New Hampshire experienced an average number of wildfires. Our Town Forest Fire Warden and the State Forest Ranger have requested the inclusion of some information in the hopes that we all can prevent fires; because most fires can be prevented with your help. By NH State law (RSA 224:270), no person, firm, or corporation shall kindle or cause to be kindled any fire, except when the ground is snow covered, without first obtaining a written permit from the Forest Fire Warden of the Town where the burning is to be done.. In order to eliminate false alarms, it is most advisable to notify your local fire department whenever you intend to do outdoor burning. Violations of this RSA are a misdemeanor; and, you are liable for the payment of all fire suppression costs. (RSA 224:28 and RSA 224:26). The State Division of Forests and Lands assisted many towns in wildland fire suppression during 1989; Milford was not one of these towns. We have, however been told that the cost of suppression was \$93,957.00. We as taxpayers pay this tab in the final analysis.

In closing, I would point out that education via the use of smoke detectors, fire extinguishers, exit drills in your home, and general preventative maintenance goes a long way to help protect you, your loved ones, and your property.

## HEALTH DEPARTMENT

As with all other departments, 1989 proved to be a much busier year that was expected. However, I am happy to report that we managed to remain within the allotted budget.

Child care facilities were on the rise in Milford. The State of New Hampshire requires a health inspection prior to opening. 1989 saw the opening of twelve such facilities in our town.

In the private sector we experienced the unwelcome task of an extensive study as requested State authorities concerning a family in our town whose children were suffering with lead poisoning. One of the children's blood level was found to be at a hazardous elevation. Fortunately the situation has been brought under control. Some stories do indeed have happy endings.

We saw the opening of several new stores and restaurants which require health inspections. As communities grow, so too, do the complaints, whether they be via other departmental request or from the private sector. In 1989 I made a grand total of 28 inspections covering a wide range of health problems. I responded to more than 35 complaints which dealt with a wide array of subjects from food establishments, rock dust in the air, overflowing dumpsters to possible failed septic systems. Our Wastewater Treatment Facility proved most helpful via their laboratory analysis of well water thought to be in trouble.

With the Health Department of the Town of Milford relying on volunteerism to deal with the problems so closely associated with the rapid growth experienced in our area, I feel that I would not be able to effect an adequate performance with out the help of some valuable people in the Town Hall. I thank Town Administrator, Lee Mayhew, Town Secretary, Joan Deguise, Shirley Carl and Bea Kimball for their invaluable contributions to this department. I look forward to 1990 and the opportunity to serve this community once again.

MICHAEL LYNCH, HEALTH OFFICER

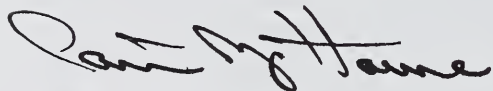

monies are used to pay for something not normally allowed within the Town Welfare Guidelines. Whenever possible these monies should be repaid so that someone else may be assisted. I am most appreciative of them.

By March 1990, I will have a billing procedure in place. Recovery for monies expended is important; but at present we have no efficient system in place. A computer terminal will more than pay for itself. It will give a listing of all clients and pertinent data, amounts expended and repaid. It will assist in verifying if a client is living in an apartment; or living with others in an "approved zone" and, the owner of the apartment building. A terminal will allow us to pull a client file, update it, and change an address in order that billing for past assistance can be rendered.

With as many as 20 contacts per working day, this department is busier than I have seen it in the past 7 years. Some questions are quickly answered; some take investigation. Applications are taken, interviews done, case notes written, verification calls made, and letters sent. Reports have to be made monthly to the State, surplus food commodities have to be accounted for monthly to the County; a monthly overview of the department's activities is submitted to the Board of Selectmen. Vouchers for payments are submitted each week. Grant applications have to be written for presentation to the Board of Selectmen.

As a member of the NH Local Welfare Administrators Association Executive Board, I attend two meetings per month in Concord. Because some devastating legislation proposed that would have traumatized local welfare budgets, three trips to Concord were made in December 1989, and January 1990 to testify. As a member of the Federal Emergency Management Assistance, Hillsborough County Board, I attended meetings once a month in Manchester. With the office open Monday, Wednesday and Friday, board meetings on Tuesday and Thursday, the schedule translates to two weeks out of the month, the Welfare Department is working 5 days a week.

Patti Z. Horne  
Welfare Director

## TOWN WELFARE

This year's report is devoted to a description of how the Welfare Department functions, plus the duties and responsibilities of the Welfare Officer.

Town Welfare (also known as General Assistance) has the prime responsibility to assist those who are temporarily unable to support themselves. This is explicitly spelled out under NH law, RSA 165. Town Welfare is only short term assistance until the client either becomes eligible for another program or finds employment. Regardless of length of residence in Milford, any person has a right to apply for assistance.

Within the application process, it is determined the kind of help person is seeking. The client signs the application with the understanding that the town is to be repaid for assistance given; that the statements given on the application are true, and give authorization to the Welfare Office to contact any person or organization that may have information concerning their eligibility for assistance. It is the client's responsibility to provide documentation required to process the application before any assistance is given. A notice of decision is sent to the client 5 days after the application has been processed.

Every application is evaluated on a standard of need. The total income and available assets of the household are determined. the total Allowable costs are calculated, including shelter, food, utilities, personal hygiene, medical, gas for job search, etc. The allowable expenses are subtracted from the income. If the income is more than the allowable expenses, the client does not qualify for assistance.

All clients must apply for other sources of assistance within 7 days of their application for Town welfare. This may be for State Welfare Programs, Fuel Assistance, Social Security, and the Department of Employment Security.

The numbers of applicants for assistance has risen due to employer cut-backs, and closings; people who have run out of unemployment benefits; who are waiting for them, or do not qualify; fuel assistance allotment has been exhausted. State Welfare offices are back-logged, and the delays getting clients into the system are running 45 days and more.

The Welfare Office has to be knowledgeable in areas such as housing, legal referrals, responsibilities of outside agencies; able to negotiate with utility companies and landlords; aware of law changes, pending legislation, (including testifying for and against pending bills). It is my job to seek out funds through various "grants." This past year I applied for a grant under the McKinney Homeless Prevention. Milford received monies to assist with utility deposits, shelter deposits and back rent. This Federal Grant is specific in usage, and cannot be used to offset the budget. Welfare also received Kaley Funds and a Kenison Grant. These grants were to be used as discretionary funds and cannot be used to offset the budget. Grant

## ASSESSING DEPARTMENT

This is the first year that the Town of Milford has indeed had the services of a full time Assessor. In February, I was hired by the Milford Board of Selectmen to oversee the day to day functions of the Assessing Department. I would like to offer my thanks to Bea Kimball for her able assistance in making my transition somewhat easier than anticipated.

Milford residents are acutely aware of the results of the most recent revaluation of the properties in this town. This project was to have been completed in 1988; however, it required a complete review. This consumed eight months of work by the Assessing department. The end result was that the finalization of the revaluation took place in September 1989. Over 1,000 abatements and/or added taxes were processed and a reduction in the total assessed value of this town in the amount of \$18,000,000. resulted. Permits for new construction produced \$22,000,000. in assessed property netting Milford with a gain of \$4,000,000. The total assessed value of the town of Milford is currently \$705,000,000. A breakdown of this figure appears at the end of this report.

During the year, we handled 120 elderly exemption and 576 veteran exemption requests. These duties, along with our general workload kept Bea and myself rather busy this year.

The town hall renovations kept our office moving from location to location with the permanent 'home' move taking place in December. Now that we feel comfortable in our new surroundings, we look forward to 1990 with vigor.

DOUGLAS SMITH, ASSESSOR

### 1989 PROPERTY VALUATION AND STATEMENT OF APPROPRIATIONS

1989 property taxes were assessed based on the following:

Net Assessed Valuation		\$703,568,30
Town Property Taxes Assessed	12,298,374	
Less Estimated War Service Credits	- 39,200	
	-----	
Net Property Tax Commitment	12,259,174	

TAX RATE: \$17.48

School	\$10.64	60.87%
Town	5.35	30.61%
County	1.49	8.52%

## BUILDING INSPECTION

The year 1989 brought a large increase in single family homes. The percentage proved out at 57.4%; however we realized only a 13% increase in overall building activity, as seen in the statistics below:

### NUMBER OF PERMITS

Single family dwellings	57.4%
Two family dwellings	-0-
Residential additions/alterations	-2.6%
Commercial/Industrial alterations or additions	-20.0%

TOTAL BUILDING ACTIVITY

### BUILDING PERMITS - 1989

96 Single Family Dwellings	\$ 5,979,500.
1 Duplex Dwelling	110,000.
8 Mobile Homes	234,900.
186 Residential Alterations & Additions	1,029,670.
35 Commercial/Industrial Alterations & Additions	435,676.
13 New Commercial/Industrial under \$75,000.	326,500.
5 Demolitions	34,500.
34 Renewals	-0-
Peterborough Savings Bank	225,000.
Milford Town Hall Renovations	1,040,225.
Dr. William Green - Dentist Office	240,000.
Valley Auto Parts	87,500.
D'Angelo's Sub Shop	100,000.
Milford Public Works Garage	273,690.
Electrical Supply of Milford	390,000.
Permattach	450,000.
Dr. Philip Aubrey - Office Addition	136,000.
Spillway Associates Elderly Housing - 54 Units	2,000,000.
Contel Cellular tower	215,000.
Physical Therapy Center	150,000.
	-----
TOTAL	\$13,458,161.

TOTAL NUMBER OF BUILDING PERMITS ISSUED 391

*Robert Milliard*

Robert Milliard, Building Inspector

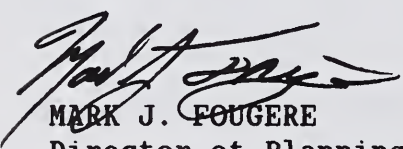

## PLANNING AND DEVELOPMENT

While residential building permits were up in 1989, as a rule the slow down in the construction industry has continued. The Planning Board reviewed 25 subdivisions, creating 157 new lots. A total of 38 site plans were reviewed, with commercial development being the most active with an additional 114,027 sq. ft. of space being proposed. Further development of the Shaw's Plaza and a proposed shopping center at the old Hayward Restaurant make up a majority of this new space. Of the 61,640 sq. ft. new industrial space approved, only the 10,000 sq. ft. expansion to Permatatch is currently under construction.

The March Town Meeting overwhelmingly approved a zoning proposal allowing 54 units of elderly housing to be built at the Town Garage site. In exchange for the land, a new Department of Public Works garage has been constructed on South St. Without this public/private partnership a new DPW Garage (which was desperately needed) was years away. This proposal saved the taxpayers thousands of dollars and will be an added boost to the downtown merchants. In addition, this project provides an affordable home for many elderly residents in Milford. At this time the new garage is operational and the housing project should be completed in late spring of 1990. Further public/private partnerships should be encouraged when the opportunity presents itself and the general public will benefit.

1989 was the first full year of our Sewer and Water Impact Fees. Twelve (12) sewer connections brought in \$34,280 and eleven (11) water connections totaled \$16,680. A portion of the sewer funds collected will go towards reducing the outstanding debt while the remaining is allocated for future design work. The funds collected from the water fees will pay for the engineering design work needed to upgrade two water lines. A portion of this money will also help reduce the cost of Pennichuck hookup.

Milford's first Capital Improvements Plan was completed by Nashua Regional Planning Commission in 1988. Since then, the document has been updated in-house and will become a yearly routine in the future. This document plays an important role in projecting needed capital projects over a six year period. Knowing when large capital expenses are going to be needed is imperative for sound budgetary planning.

MARK J. FOUGERE  
Director of Planning

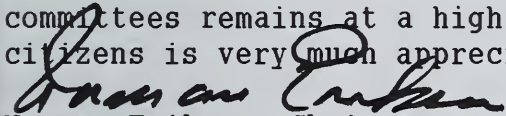

## PLANNING BOARD

Plans coming before the Board and the resulting decisions made are becoming increasingly complex. As the less buildable land is being developed all phases of construction from site work to the finished product demand more attention from the Planning Board.

Due to the high cost of land and construction the builder/developer seeks to develop and market every square foot available. This situation has led to many proposals that involve high density residential development, poor well and septic system locations, potential for ground water degradation and impact on wetlands i.e. crossings, fillings and buffer zone violations. It has become necessary to scrutinize all plans that come before the Board in order to limit the possibilities of negative environmental impacts.

The most complex issue the Board faces is the necessary engineering studies and the understanding and interpretation of these studies. These studies and reviews are required not only by the Planning Board but also by other authorities. We are fortunate to have at our disposal several engineering firms to guide the Board in making decisions.

The cooperation between the Planning Board and other boards and committees remains at a high level. The continued support of the citizens is very much appreciated.

  
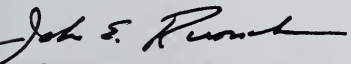

Norman Erikson, Chairman

## BOARD OF ADJUSTMENT

During 1989, the Board of Adjustment received and acted on sixty-four (64) appeals; this represents approximately the same number as we dealt with in 1988. There were forty-two (42) requests for variances; twenty (20) special exceptions; two (2) administrative appeals; three of which were subsequently withdrawn, and two on which no action was taken. Additionally, this board received seven requests for rehearing, granting two.

Several sections of the Zoning Ordinance appeared to create a need for applicant relief in 89; among them were areas addressing signage; what constitutes a 2 family home; and some special exception requirements.

As usual the ZBA continues to work in concert with the Planning Board in an effort to resolve areas requiring adjustment.

  
John Ruonala, Chairman

## NASHUA REGIONAL PLANNING COMMISSION, 1989

1989 has been a year of significant progress in our efforts to improve services to our member jurisdictions; and I am pleased to submit my first NRPC annual report to the Town of Milford.

NRPC continues in its mission to provide technical assistance to our local members, to serve as a regional forum in the promotion of intermunicipal cooperation, to speak as a collective voice for our member communities on issues of local concern to state and federal agencies.

On the subject of Land Use, notable accomplishments for 1989 include the provision of part-time professional planning assistance to 4 local planning boards via the 'circuit rider' program. We assisted a number of communities in drafting or revising master plan components, zoning ordinances, subdivision and site plan regulations and capital improvements programs. We conducted two planning board training workshops in order to assist local members in the better understanding of the responsibilities, procedures, land use regulations, and development review techniques.

For transportation, we prepared an updated Transportation Improvement Program in cooperation with local, state and federal agencies providing a priority list of transportation projects in the region. We maintained the regional traffic count system, with counters at over 90 locations throughout the area, in order to provide the most accurate and current data for traffic analysis. We undertook the annual air quality assessment with the NH Air Resources Division of DOT to assure local attainment of the National Ambient Air Quality Standards. We began Phase II.....the implementation alternatives of the Nashua Passenger Rail Study and provided staff support to the Legislative Advisory Committee continuing to work toward returning passenger rail service to the Nashua region which includes Milford.

With relation to information and mapping services, NRPC continued in the role of regional data center for the U. S. Bureau of the Census. We have monitored development and collected data on the changes in residential, commercial and industrial land uses. We have prepared and published the **Regional Housing Needs Assessment** to assess progress in, and to provide strategies for, the provision of adequate and affordable housing in this region. We are continuing the development of the geographic information system (GIS) in order to enhance our capacity for computer based mapping and information management.

Under the heading of environmental management, we conducted the spring and fall household hazardous waste collection days at multiple sites (Milford being one) in the region. As a result of the success of this project, Milford has elected to conduct two (2) days in 1990. We have provided staff support to the Souhegan Septage Study to continue to assist in finding the most appropriate long term solution to this problem.

Don E. Zizzi, Executive Director, NRPC

## CONSERVATION COMMISSION

At the Town Meeting held last March, we of the Conservation Commission were thrilled at the affirmative vote to purchase some 45 acres on Savage Road, thus enlarging the Milford Green Belt area.

With the valued assistance of the Trailwrights, the local Boy Scouts, and, the local Girl Scouts, the commission has been able to get a lot of work done during 1989. The Mayflower Hill area received a great deal of attention in 1989. A new access point is being developed through the property where the town stand pipe is located. The Trailwrights are helping with the improvement of the trail; and Girl Scout Troop 2028 had 'adopted' this trail as an ongoing clean up and maintenance project.

The town forest trail system saw the first of several planned trails developed this past summer in the Tucker Brook Town Forest. The valuable assistance of the Trailwrights plus local scout troops blazed the trail system which is a loop beginning and ending at the public access point on Boulder Drive. A sign has been erected at the entrance for the convenience of the public.

The Commission has embarked on a not too publicized project of replanting trees on major routes in Milford. First begun with a challenge grant from Hitchiner Corporation, we continue to try to locate area in town to plant trees. In 1989, trees were added on Nashua Street, the Oval, and Shepard Park. If you are a property owner on with Elm or Nashua Street, and wish to have a tree planted roadside, please contact the Conservation Commission. They are at no cost to the public.

Another area that this Commission is proud to report on is the Conservation Plan. We report that Milford is the first in the area and one of the first in the State to have compiled a Conservation Master Plan. It has been completed and reviewed by the Planning Board. We held several public hearings and the plan is now incorporated into the Milford Town Master Plan.

Some time ago, the Commission agreed to assume responsibility for the management of the maintenance of Emerson Park. This was done with the approval of the current Emerson Park Committee. A major clean up was conducted on the location this past summer. Also receiving a great deal of attention this past year was the Mullen Road property, also known as the 'Hitchiner Land'. Again, with the valuable assistance of the Milford Boy Scouts, under the direction of Jim Lawler, and with the help of the DPW, much debris has been removed from this area. There is now a parking area and measures to control vehicle traffic onto the property itself have been taken.

One long standing project for us has been the development of a walking corridor along the north bank of the Souhegan River, beginning at the Post Office, and reaching possibly to the Green Bridge. An easement has been indicated on the site plan developed by Stanley Trombly for a strip of property bordering the river furthering our

efforts to protect this valuable town resource.

The commission has undertaken several other projects in 1989; however, many times projects stall due to the heaviest workload brought to our board. This is in the realm of Dredge & Fill application requests. In 1989 we reviewed 35 projects. All of these kinds of requests require site walks and numerous meetings reviewing data. These dredge & fill applications are projects overseen by your local Conservation Commission as part of the wetland and aquifer protection and in conjunction with the State Wetlands Boards.

We could not end our narrative without noting that the love of the land and the desire to protect its natural resources on behalf of Milford's residents has once again proven to be one of the most valuable conservation aids that the town has. Of particular note during 1989 was the generosity of Harlan (Bill) Burns, Bill Rotch, and Stan Trombly. Each of these men made a significant contribution to the town; and, furthered the objective to retain a bit of the rural character beloved by Milford residents.

Russ Monbleau, Chairman

## WADLEIGH MEMORIAL LIBRARY - DIRECTOR'S REPORT

1989 has been a year of contrasts at the library. During the first part of the year library use decreased from the high levels of 1988. A budget cut of \$5300 voted at Town Meeting forced the library to curtail hours and restructure the staff. Margaret Comolli resigned as Children's Librarian in March and the position was left unfilled until late June to help make of the revenue shortfall. Things began to turn around in May. Thanks to the generous donations from the Kaley Foundation and the Keyes Trust, the library was finally able to complete air conditioning of the building. The project was completed within budget; operating costs were actually less than originally estimated and the library was pleasantly cool all summer.

Our new Children's Librarian, Stephanie Minter, was hired on a part-time basis in June. Working closely with Children's Assistant, Joan Bajek, she ignited the children's program with high energy and library use took off again! By year end a new all-time circulation record for Milford had been set. The revenue shortfall was made up by the end of summer and normal hours were resumed after Labor Day, albeit with an even tighter staff schedule than before.

Work continued throughout the year on the conversion to an automated catalog and circulation system. With help from the Friends of the Library, all the books received barcode labels. Most of the adult book collection has now been entered in the computer database and work has started on entering children's books. Public access catalog terminals will be available for use by April of 1990 and the on-line circulation system should be in service by summer.

Another technological marvel arrived in Milford with the Infotrac Magazine Index. This is a leased computer system which indexes 450 magazines for a period of years. Patrons can now find important articles in seconds with a few keystrokes. This new service has been very popular with both students and adults doing research on any number of topics. Coverage of business news is particularly good. January saw the installation and dedication of the wonderful mural painted by Erick Ingraham. This is located in the Children's Room and was made possible by donations and fundraising efforts in the community during the previous two years. Erick came back to the library during the summer to put on an excellent program for the children.

There were 1234 new borrowers registered during the year, continuing the pattern of strong growth experienced over the previous four years. We expect that library use will continue to grow during 1990 provided that hours of service can be maintained.

Arthur L. Bryan  
Library Director

WADLEIGH MEMORIAL LIBRARY  
REPORT OF THE TRUSTEES - 1989

1989 proved to be the busiest year in the history of our library. We report that the 100,000 transaction milestone has been exceeded. A hardworking and dedicated staff handled the added workload with their usual great spirits. Newly computerized systems have proven themselves by making our transactions more efficient and accurate.

Due to a budget cut at last year's Town Meeting, the trustees found themselves making a difficult decision to reduce the service hours of the library. We felt that due to the limited number of staff personnel, it was impossible to continue to offer quality service at full hours at the reduced budgetary dollar amounts. The cutback in hours continued until September when the necessary funds to resume regular hours had been recouped. Even so, the trustees remain concerned with the understaffing of the library, as we expect continued growth in 1990 and the years ahead.

A survey conducted earlier this past year has indicated that users would like to see the library open for additional evening hours, Sundays, and summer Saturdays. All reports indicate that the increased use of the facility merits expansion of hours; however, with an even tighter budget for 1990, we do not propose to increase our hours at this time. We have elected to continue operation at the high level of service within the existing schedule. Certainly we hope that within the next few years, we will be able to provide our patrons with the additional hours desired and deserved.

We again commend those volunteers who give so much time to our institution. They truly are "Friends of the Library." We also wish to cite our Director, Arthur Bryan and Assistant Director, Mary Ann Doyle as professionals without equal in this area. Their leadership has gone far to make the Wadleigh Memorial Library become known as one of the finest in the State of NH. Arthur's abilities have been further recognized with his recent election as President-Elect of the New Hampshire Library Association.

The expanded building continues to function well. Thanks to grants from the Kaley and Keyes Trust Funds, we experienced a cool and comfortable working condition this past summer with air conditioning.

Milford has good reason to be proud of its library, the staff, services, and the collection of library materials. If you have not used the facility recently, come in and let us explain how we can be of help to any research project that you might have.

## 1989 SUMMER BAND CONCERTS ON THE OVAL

The 'umpteenth' Band Concerts on the Milford during the summer of 1989 displayed a continued attendance growth. We on the committee promised a wide variety of music and an upgrade of the group being invited to play on our Oval. We found four new groups this past year..... A German Band, a Polka Band, A Dixieland Band, and the Klezmer Conservatory Band. The latter was everything that we promised and more. From the reports that we received, we understand that 'they danced to the German Band; they danced to the Polka Band; they stomped their feet with the Dixieland Band; but oh how they cheered the Klezmer Conservatory Band.

I feel compelled to sound off about the need of a sound system for the Oval. For the Klezmer concert, we had the luxury of a great sound system loaned to us by CSS Sound. The comments rippling through were real favorable, so we will possibly be attempting to rent the system again for summer of 1990.

We would like to thank the Police, Fire, School and Public Works Departments for the assistance lent to make a successful season. The merchants were most kind in the display of our posters. We cannot forget our various benefactors who made our project financially sound when we came to the limit of our town budget. The folks at Town Hall were helpful and must not be forgotten in our line of thank yous.

Lastly we must pass on to you some of the comments from musicians who perform in our town. They tell me how courteous, enthusiastic and kind Milford audiences are. We know Milford is great; it is just so nice to hear the performers reinforce this. One of the nicest things about working with this project just happens to be Milford residents. Public Works clean up crew has their work lessened since Milford residents not only enjoy open air concerts, they keep their oval clean. This does not always happen in all communities. Milford, thank you for your support and congratulations on your desirability.

Harry W. Tong, Chairman

PUBLIC WORKS DEPARTMENT

*Robert E. Courage*

ROBERT E. COURAGE, DIRECTOR

YEAR ENDING DECEMBER 31, 1989

## HIGHWAY SUMMER ROAD MAINTENANCE

In addition to routine highway relate maintenance tasks, we accomplished the following:

A 6" lift of crush gravel was applied to a .9 mile section of Mileslip Road.

Hot top resurfacing for a total of 3.75 miles benefited Valhalla, Briarclift, Millbrook, & Ridgefield Drives, George & Walker Streets, Old Wilton, McGettigan, and Savage Roads. Road oiling, liquid asphalt, cut back and covered with sand was applied to Jennison, Joslin, Hartshorn Mill, Richardson, Riverlea, Purgatory, and sections of Savage and Osgood Roads for a total of 4.5 miles. Double yellow center line pavement markings now total 22 miles, and white edge lines total 6 miles.

The DPW currently maintains 179 streets/roads, included are sixteen bridges. Mileage totals 64.74.

## HIGHWAY DRAINAGE

In addition to removing sand accumulation from the 725 catchbasins, the following is other work accomplished:

New catch basins were added on Osgood Road, Oak and Spruce Streets, thus eliminating persistent drainage problems in these areas.

A 300 ft. section of new steel beam guard rail replaced deteriorated wood post and steel cable guard rails on Union Street at a culvert located near the entrance of Route 13 (South Street).

## STREET LIGHTING

No new lights have been added for the past several years. There are many areas of town where lights should be added. Efforts by this department to obtain the necessary funds for this purpose at prior Town Meetings have been voted down. We will keep trying. Currently, Milford rents 382 street lights from Public Service Company.

## HIGHWAY RESURFACING

Article 9 of the 1989 Town Warrant was approved authorized the expenditure of \$31,000 from the Highway Capital Reserve Fund for highway resurfacing. As a result the funds were used for asphalt hot mix to resurface the following areas in town:

A 900 foot section of Nashua Street, east of Ponemah Hill Road, West Street; a 700 foot section between Elm and Crosby Streets; Amherst Street; a 450 foot section between Mont Vernon and Grove Streets; and Elm Street - west of the 101 bypass to the Wilton Town Line.

## HIGHWAY WINTER MAINTENANCE

Snowfall for calendar year 1989 totaled only 32.6", causing our plows to be used for a total of 9 storms. Even though the season's accumulation was less than one half of the 70" annual snowfall for this area, we experienced numerous freezing rain storms overspending the sand and salt budgets by \$14,200. in our attempts to provide safe roads for motorists during those rather treacherous weather conditions. There is a strong emphasis on the use of more sand than salt. This has been and will remain our departmental policy.

With minimal snow accumulation, rental of hired equipment for plowing came in under the budgeted amount by \$12,400. Even though we experienced over runs in other areas of this budget area, we saw a surplus of \$2,500. at fiscal year end.

Brush cutting, tree trimming, and tree takedowns were worked as weather permitted in locations throughout the town. Numerous worn and missing street and caution type signs were also replaced.

## COTTAGE STREET RAILROAD CROSSING RECONSTRUCTION

A project, estimated by the N.H. Department of Transportation to cost \$130,000, provided for removal of sections of abandoned track and replacement of old ties on the two remaining crossings. Federal Funding provided 90% of the cost; therefore, Milford's share of the cost was only 10%, or \$13,000. This was appropriated at the 1989 Town Meeting. The State required that the town's share be sent to them prior to the commencement of construction; and the town was also required to front the monies for all equipment rental and material costs for the project and submit reimbursement request to the State after completion of the project. This has resulted in an over-

expenditure in that area of the budget. We will receive our reimbursements in 1990 to offset the 1989 overexpenditure. It is important to note that the town's cost share remains within the appropriated amount.

## PARK MAINTENANCE

The several town parks, the library, police station grounds, and the MCAA field provide about 30 acres of mowing for DPW crews. With the frequent rain we had last summer, lawns required cutting on a weekly basis. In Keyes Field, grassed areas were aerated, fertilized, and overseeded in an attempt to replace worn sections of turf.

Tree work including trimming and fertilizing was done on the Oval, Hartshorn Park, War Memorial, and Bicentennial Parks. A diseased maple was removed from the Oval; and the Conservation Commission replaced with a Norway Maple believed to be a more heartier tree than the sugar maple.

## RECREATION PARKS

Keyes Pool operated well during the 1989 season. Several sections of old deteriorated galvanized pipping was replaced with PVC pipe in the mechanical roof at the pool. The roof was replaced and both the wading and the main pools were repainted; as was the interior of the poolhouse.

Pool repairs and maintenance continue to be attended to by the Wastewater Treatment Plant maintenance staff. This has eliminated the hiring of outside contractors, thus saving a substantial amount of money in recent years.

An additional piece of playground equipment referred to as the "Timberworks" was erected at Keyes Field. This unit was purchased with private donations, raised through efforts by the Milford Mothers Club, supplemented by 1988 Town Meeting appropriated funds. The Milford Mothers have committed a painting of the recently repaired Merry-Go-Round at Keyes Field this Spring. This particular group of ladies certainly deserve accolades. I personally extend my thank you to them!

## KEYES FIELD IMPROVEMENTS

Funds earmarked from 1988 were used to purchase concrete for the foundation of the new piece of playground equipment (Timberworks) erected at the field.

### KEYES MEMORIAL POOL - 1989 SUMMER SWIMMING PROGRAM

Swimming instruction is a major portion of the swim program at Keyes Pool annually. All classes are designed by the American Red Cross, and are conducted by certified water safety instructors. The lessons were held between the hours of 9 am and Noon, Monday - Friday for all levels from Novice through Advanced , and included two new courses in 1989 called Basic Water Safety; and Emergency Water Safety.

Overall participation this past summer increased approximately 15% over the summer of 88'. This was the first season where people were put on a waiting list for lessons. We witnessed an average of 350 persons participating in the swim instruction program this season. In addition to instruction swimming, the pool was open to the general public seven days a week from 1:30 -8:00 pm for free, lap and family swim sessions.

Our swim team again succeeded in the achievement of first place in the annual state meet in Dover, as well as in the annual Rotary invitational meets..The team competes in the third division; and all meets are organized by the Swim Team Boosters's Club. They are free and open to the public.

We saw an overall increase in the use of the Keyes Pool this past summer. While some 350 people swam during the months of July and August, the numbers dropped to about 175 people per day toward the end of summer. Even with the increase, the summer of 89 was a relatively safe one. We saw the usual minor scrapes, bumps, bee stings; yet not once did we require the attendance of the Ambulance squad.

I commend the dedication and efforts displayed by the Keyes Pool Staff and the maintenance personnel. Thanks to all of you, the summer of 89 was a safe and enjoyable one.

Jean Pierre Lamarre  
Keyes Pool Supervisor

### TENNIS PROGRAM

During the summer of 89, the Parks and Playgrounds committee conducted a tennis program for Milford adults and children. Tennis lessons were offered hourly from 8 am - 2 pm Monday - Thursday, in three (3) week sessions. These were of course, open to area residents interested in learning the basics of the game. Approximately 100

residents took part in this program, many returning from the summer of 88. While the class size had to be limited to twelve (12) players who were 'signed up', those persons appearing without appointment benefited from the lessons also. Lessons were grouped according to age. We found that the average age of the child attending was 11 and 1/2.

Participants were taught the basics of singles and doubles playing. They were encouraged to practice by playing daily. Merit ribbons were awarded to all who participated. A round robin tournament was held for the age 18 and under group. This tournament played by level of learning; i.e. beginner, intermediate, and advanced. Trophies were indeed earned.

the Parks and Playgrounds Committee is quite proud of its accomplishments. However, it must be emphasized that our dreams and goals are achieved with the support of the Department of Public Works Keyes Pool, and various other personnel of the town. Our committee members are dedicated to this program. We thank the parents of the children for supporting us, and proudly state that this program effectively serves the youth in Milford. See you in the summer of 1990.

Jones Crossing Bridge (also known as the Green Bridge)  
Use of this bridge for vehicle crossing will be discontinued in the summer of 1990

## OSGOOD POND DAM REPAIRS

Loenco, Inc., a Tyngsboro, Massachusetts firm commenced work on the dam at Osgood pond in November 1988. Work on this project included a new full-length concrete retaining wall, restoration and enlargement of the existing spillway. Other areas of repair included the provision of a sluice gate, brook banking stabilization, and, of course, landscaping. The project was completed in May of 1989 to the delight of the residents in this area. It's park-like appearance has drawn numerous residents to fish, dangle the toes, and simply enjoy the view. The best news besides the fact that a "Watch Out - Geese Crossing" sign is present, is the fact that this project's cost is about \$2,500. below the construction estimate given.

The Milford Elderly Housing complex on Pine Street. We are still looking for a name for the complex. Can you help?

## NEW DEPARTMENT OF PUBLIC WORKS GARAGE SITE WORK

After the design site plan was completed and the necessary state permits were approved, work began with the filling of the area north of the South Street Pumping Station early in July. About 4,500 cubic yards of fill raised this site approximately four feet. Developer Steve Krook then poured the building footings and the foundation walls toward the end of July.

Underground work was then completed by the DPW crew. This consisted of the installation of a closed drainage system of 578 ' of 12" pipe and 6 catchbasins. Then 289 ' of 8" sanitary sewer pipe was installed with 4 manholes. A pump was installed to lift sewage into the new 15" gravity sewer on South Street. In order to avoid building over an existing water main, 260' of 12" water pipe had to be relocated. We then installed granite curbing and landscaped the area.

An on-sight inspector, from the engineering firm of Dufresne-Henry, visited the project, on an as needed basis, from early July until November when the project reached completion.

This new modern facility provides DPW with an 8 bay garage, 1200 square feet of finished area that includes a shop, office, lunch room, restrooms, tool room, and parts room. The bays are 60 feet which enables the storage of trucks with plows on. All of the department's equipment and the Fire Department's lift bucket truck are at this location.

In return for the old garage property on Pine Street, the Developer has provided Milford with an 11,800 sq.ft. steel building constructed on a 4' concrete foundation. The site has been graveled, paved, and a 6' high chain link fence, yard lighting provided. We also now have a 3 bay concrete salt shed which provides storage for 375 tons of salt or sand.

The Department of Public Works wishes to extend heartfelt thanks to you the voters who supported this project addressing our needs for the foreseeable future.

## TOWN BUILDINGS

This budget request for 1989 was about \$7,000 less than that of 1989 since the town hall renovation project started in April.

### TOWN HALL BUILDING:

During the winter, problems persisted with the heating system with only emergency repairs being made since a new heating system was to coming with the start of the renovation project.

As a result of construction activities, all town offices relocated to temporary operating quarters within the building. We are acutely aware of the inconvenience this caused to the public; however, we surely hope that you the voter will realize the enormity of strain that this placed on staff. Town Hall staff worked under some of the most trying conditions and strived to maintain some semblance of professionalism and dignity. We are now all back into our permanent 'homes'. Thank you for your patience.

### TOWN GARAGE:

From January until mid-October, DPW occupied the Pine Street facility expending only operating funds in the way of heat and utilities. In mid-October, we moved into our new facility on South Street. Materials were purchased for a roof over spreader storage racks and for shelving inside the building. We now enjoy a building that is twice the size of the old cement block building. The men smile a lot today.

With the completion of the Town Hall renovations and the new DPW garage, operating costs for both buildings will increase in 1990.

## PUBLIC WORKS ADMINISTRATION

During 1989 several special town projects were administered by our office. The new sewer extensions on Summer Street, Birch Lane, Mayflower Drive, Falconer Avenue, South Street, Shady Lane, Ridgefield, Georgetown, and Wellesly Drives; as well as the completion of Osgood Pond Dam and the new DPW garage. The railroad crossings on Cottage street and, of course the Town Hall Renovation project became realities.

Constructed to accommodate development, Scarborough Lane, Howard Drive, Iris Road, Boxwood Circle, and Fern Court were accepted as new Town Streets.

This office continues to provide on-site construction inspection for the Planning Board with respect to all new street and utility construction within Milford's boundaries. This year saw continued work on Glen Drive, Homestead Drive, Ashley Commons, Hillsboro Woods, Sunview II, and Sunset Circle. When completed, these streets will become part of Milford's road inventory.

Rita Therrien, my secretary of fifteen years, retired on December 1, 1989. A dedicated employee, Rita will be sincerely missed by the entire town hall staff. June Ramsey has transferred from the Waste-Water Treatment Facility office to fill this position.

New home of the Department of Public Works located on South Street

## RECAPITULATION

JANUARY ..... 4.3  
FEBRUARY ..... 5.3  
MARCH ..... 8.9  
NOVEMBER ..... 5.1  
DECEMBER ..... 9.0  
GRAND TOTAL 32.6

Traces of snow (less than one-tenth inch) fell on March 5 and 12, April 22, November 12 and 28, and December 20, 21 and 26

This was one of the most snowless of years in over six decades of local record, totaling less than half the long-term average of 70 inches annually for this area. Only three storms -- on Good Friday, Thanksgiving, and a week before Christmas -- exceeded four inches. Yet there were numerous small storms, usually winding up as freezing rain, that required a substantial sanding and salting effort.

Andrew E. Rothovius, National Weather Service Co-operative Observer

## CEMETERIES

Due to the above normal amount of rainfall last summer, our regular mowing crew found it difficult to keep up with the mowing of all 5 Milford cemeteries which cover approximately 20 acres of grass. Extra help was necessary during the peak of the growing season prior to Memorial Day.

Sadly, I have to admit that we again have experienced continued vandalism to grave stones in the West Street Cemetery. Fortunately, 1989 did see a lesser degree of this type of activity.

In Riverside Cemetery, trees were trimmed and work continued developing the additional lots in Section F.

## SOLID WASTE TRANSFER STATION

Over the past three years this appropriation request has sharply increased from \$424,200 in 1985 to \$962,500 in 1989. Reasons for these costs are landfill disposal at Turnkey in Rochester, has risen from \$39.40 per ton in 1985 to \$76.60 per ton in July of 1989. Milford's steady growth during this period has added to the community's solid waste stream. About 55% of the volume delivered to the facility had remained commercial until April of this year. Therefore, revenues paid by all commercial haulers increased as gate fees were increased, to offset disposal costs each year.

April, saw Wheelerbrator Co. opening their new waste to energy disposal facility in Pennacook. The three largest commercial haulers who were patronizing Milford's facility, elected to haul to this new site. As a result a dramatic reduction in tonnage received at our station took place.

11,351 tons of trash in 1988 dropped to 7,139 tons in 1989; 33% (2,363 tons), or a decline of 4,000 tons (commercial) less than the previous year. This translate to \$231,600 surplus in this budget being returned to the General Fund in December 1989.

At the Town Meeting, voters supported the mandatory recycling ordinance. A five year contract was entered into with the Resource Development Corporation for \$37.00 per ton for the first 2100 tons per year for co-mingled recyclables (ferrous cans, plastic milk and beverage containers, aluminum cans, and glass), corrugated boxes, newspaper, and computer paper are also accepted. From September through December, 357 tons of recyclables were removed from the waste stream. We are currently recycling about 23% of residential tonnage, this is considered very good since we have only been operating a few months. With the unanticipated reduction in commercial tonnage, we have concerns with regard to meeting minimal yearly tonnage commitments to the recycling contractor. Savings through recycling from August through December were approximately \$10,000.

DPW employees have further removed metals, tires, and batteries from the solid waste stream. A waste oil disposal container is currently available to accept residents' used motor oil. By this type of separation, we now generate a revenue with the disposition of these materials via the New Hampshire Resource and Recovery Association.

This year, Tammy Scott was promoted to Facility Supervisor. This eliminates the position of Gate Attendant, and reduces the staff from 4-3 employees; thus realizing a \$10,300 savings in the salary account. This move makes for a more efficient operation also.

In preparation for the recycling program, the Town incurred some one time expenses at the station. The recycling contractor has upgraded the existing equipment storage building for use as a center for recyclables.

Our present 5 year contract with Lakes Region Disposal will expire

on June 30, 1990. Selectmen have signed a letter of intent with Wheelerbrator Company for short term disposal at the Pennacook facility, (3 yrs). A long term (20 yr) disposal facility is to be built by Wheelerbrator in Epping. It is projected to be operational by 1993. Waste to Energy appears to be a more viable approach to waste disposal than the continuance of burying trash.

Governor Judd Gregg and Craig Cassarino at the Recycling Center at the Transfer Station ....Summer 1989

## WATER DEPARTMENT

Source of Supply - The intermunicipal connection with Pennichuck Water Company was completed in April. This 16" main has the capability of supplying up to 2 MGD. It presently provides the town with a backup supply should we experience problems with our three gravel packed wells.

In August, the 400 GPM Curtis #2 well submersible pump motor failed. The unit was removed and completely rebuilt. This supply was off line for about four weeks. Fortunately during this period, the water use was normal due to last summer's frequent rain. With the Curtis #1 well pumping 700 GPM and the Kokko Well pumping 200 GPM, we were able to meet the demand.

Distribution System - Defective main gate valves on South, Mont Vernon, and Perkins Streets were replaced. 260 ' of 12' water main were relocated in the South Street Pumping Station yard to avoid having the water line under the new garage floor. An existing program that will eventually provide all water meters with outside readers was accelerated this year. About 250 meters were converted. Of the 2700 meters in service, 1/2 can now be read from an outside reader. Currently there are 37.76 miles of main pipe and 370 hydrants in the system.

Storage - The stone foundation that supports the 250,000 gallon Prospect Tank received masonry repairs. An inspection of the 500,000 gallon Dram Cup Hill tank indicated stress cracks in the dome section. The Natgun Corporation, who built the tank in 1961, made the required repairs at no charge. Their comment was that this problem should not have occurred.

Administration - In April the anticipated water rate, increase, to pay for distribution system improvements, and the monthly standby fee for Pennichuck became a reality. The average water user's billing with a use of 10,000 cubic ft of water annually, increased by \$44.00. Impact fees generated by new service connection provided \$15,000. in funds which are earmarked for future distribution upgrades as required with system expansion.

# WATER DEPARTMENT STATISTICS - 1989

Minimum Day - Total gallons pumped - November 23, 1989	600,000
Maximum Day - Total gallons pumped - October 10, 1989	1,140,000
Average gallons pumped per day	791,000
New water main added - 12"	-0-
New water main added - 8"	510'
New water main added - 6"	-0-
New Services added	58
New Hydrants added	1
Main Water Breaks	9
Hydrants Replaced	2
Main Gate Valves Replaced	6

## WASTEWATER TREATMENT FACILITY

1989 marked the eighth year of operation of this facility . Wastewater flow increased 4.5% to 1.15 million gallons per day, a total of 421.19 million gallons annually. The facility is operating at 53% capacity. The Town of Wilton continues to contribute 11.7% of the flow. Treatment of this wastewater volume yielded 331 tons of solids, the equivalent of 1815 pounds daily. Solids production increased 26% this past year. Increased dumping of septage from homes outside the sewered area accounts for most of the higher solids volume. All of the solids.... 1950 cubic yards..... were processed through the compost facility. The final compost product is available at no cost to the general public. It is usable as a soil amendment when planting a new lawn; it can be applied to existing green areas. Additional uses include reclamation of barren areas, incorporation into flower beds; or it can be spread around trees and shrubs.

This facility usually runs well with few significant NPDES violations, although, the chlorine residual limitation is violated almost daily as we are not equipped to meet the new standards required by the EPA. The Town has requested a waiver from EPA, that would pertain to the revised chlorine residual limitation of 0.07 mg/l. This request has been based on the results of monthly acute toxicity tests conducted on the effluent. The overexpenditure in the lab account is due to these required toxicity tests which were not budgeted for in 1989. Other NPDES violations relate to an occasional pH or solids limit being exceeded.

Approval of the Industrial Pretreatment Program should soon be forthcoming. The program was resubmitted to the EPA for approval in the spring. The program has been reviewed and put out to Public Notice for 30 days. If negative comments are not received within this period, final approval will be granted.

Work continues within the 1986 Warrant Article for the belt press and storage building. Modifications to the troublesome drive units on the sludge pumps have been made. Insulation purchased for the vehicle storage building is being installed; and the heating system from the old DPW facility, once removed, is being installed in this building.

Sewer users will see an increase in their bills in 1990; the sewer rate has increased from \$2.50 per 100 cubic feet to \$3.00 per. This increase is necessary for repayment of the 1.118 million dollar bond issue for the new sewer extensions authorized at 1989 Town Meeting. An evaluation of the septage dumping fees brought about an increase in this fee structure also. They now reflect the actual cost of handling the material.

In the never ending search for ways to save monies, we became part of PSNH's interruptible program this past December. This program

runs for a 3 month period during the coldest weather when electrical demands are at their highest. As part of this program, PSNH can ask that we shed electrical load to help reduce usage. During these times, the facility operates on its standby electrical generator. Participation in the program entitles WWTF to credits upwards to several thousand dollars which may be applied against our electrical bills. The WWTF expends approximately \$100,000. annually in this area.

We anticipate that the 1990's will most certainly bring more stringent requirements from the EPA. New sludge disposal criteria and limitations have been proposed which will become part of our NPDES permit. Water quality criteria is currently being developed for receiving streams such as the Souhegan River. Once this criteria is developed, effluent quality requirements will become more strict; already evidenced by our chlorine residual limits.

### WASTEWATER COLLECTION SYSTEM

The majority of work within the collection system during 1989 involved routine maintenance activities ..... flushing, rodding, masonry repairs, and monthly inspections of the siphon chambers. 28,600 feet of sewer mains were flushed, including all mains north of the Souhegan River. In addition, many troublesome lines, (Crosby & Powers, and sections of Nashua Streets) were flushed. The sewer rodder was utilized to cut root intrusion on older sections of Crosby, Dearborn, and Pleasant Streets for a total of 1775 feet.

T.V, inspections were conducted on problem sections of Dearborn, Pleasant and Souhegan Streets. Root intrusion, several leaking joints, and cracked pipe sections are present on Pleasant Street. Sewer problems were revealed on Dearborn Street .... root intrusion and leaking joints, but most importantly, several sections of collapsed pipe. This particular line, as evidenced by the inspection, is in real need of replacement within the next year or two.

Considerable work was performed on sewer manholes over the course of 1989. In conjunction with road resurfacing on Briarcliff, Ridgefield, and Valhalla Drives, several manholes have been rehabilitated. Manholes were sealed, and riser sections installed on eight structures, while chimneys were repaired and adjusted to grade on seven other structures in this area. Grade adjustments were made on approximately twenty other structures as part of road resurfacing. Inverts were constructed in ten old manholes on Westview Terrace, West, Crosby, Souhegan, Forest and Pine Valley Streets. Numerous other structures saw miscellaneous concrete repair. Much of this work accounts for the overexpenditures in this particular portion of the WWTF budget. Our staff assisted DPW crews in the installation of sewer, water, and drain lines for the new DPW facility. A new sewage pump was installed for use at that location.

Eight sewer stoppages were reported to us during the year. One

service required replacement by Town personnel from the main to the property line. Six other services were replaced by the property owners from the house to the property line.

Fifty-four sewer connection permits ..... 48 residential, 6 commercial/industrial ..... were approved in 1989. Four of these services were installed to the property line by WWTF and DPW staff with reimbursement of costs to us by property owners. There are approximately 2100 customers connected to and served by the sewer system.

Sewer extensions installed by private companies/developers decreased substantially this past year. Pizza Hut on Elm Street extended the 8" main 300 feet, thereby correcting a long-standing sewage disposal problem. New sewers installed at no cost to the Town include 128 feet of 15" main on Mont Vernon Street, and 322 feet of 8" main on Sunset Circle. All in all, it has been a interesting and busy year.

### NEW SEWER EXTENSIONS

At the 1989 Town Meeting, voters approved the extending of new sewers to three existing neighborhoods. The amount of monies appropriated, based on preliminary design estimates was \$1,118,566. These sewers, once completed, will eliminate sewage disposal and other pollution problems plaguing these three areas for many years. The need for sewers in all of these neighborhoods was recognized in the mid-70s' when planning for this facility was in progress. At that time plans for all of these projects were designed. However, they were not constructed in 1979-1981 with the other sewer-related activities. The lack of Federal funding for this type of project, and constraints on town funds put these projects on hold until now.

Following appropriation of funds, the engineering firm of Dufresne-Henry was engaged to develop the final plans and specs required to put the projects out to bid. In the Summer Street, Shady Lane area (Contract #5), adjustments were made to the original design in order to accommodate all lots in that area. In the Ridgfield Drive area, (Contract #6), we were able to considerably reduce the total linear footage, and raise the sewer mains while still serving the entire project. On South Street (Contract #7), the sewer was relocated to the shoulder of the road; and the depth of bury decreased which resulted in a savings.

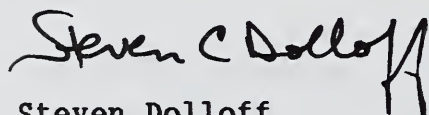

The projects were put out to bid, with a bid opening taking place at the end of May. A great deal of interest was expressed with some 12 firms bidding on each project. The general downward trend in the construction field was exhibited with lower bid prices than originally anticipated being received. The bids were awarded as follows:

Contract #5 - Summer Street - Daniel D'Onfros	- \$365,690.30
Contract #6 - Ridgfield Dr - Parker & Daughters	- \$220,296.20
Contract #7 - South Street - Masci Construction	- \$ 79,871.00

Construction commenced in June with a winter shutdown in November. Contract #5 has reached 50% completion with sewers installed on Mayflower, Falconer, Birch, and a portion of Summer Street. Contract #6 has reached substantial completion with all sewer mains and services installed to the property line. Connection notices have been sent to all property owners in this area. The main line on Contract #7, South Street has been installed and activated. Services to the east side of South Street will be constructed in 1990. Substantial completion is expected to be reached in 1990 on all projects. Final paving of streets will be accomplished following a one-year trench settlement period.

Repayment of the 20 year bond for this project begins in 1990 with a first year payment of \$134,000.00. The sewer rate has been increased by .50 per 100 cubic feet to meet this payment. When all projects are completed, 126 new building units will be connected, thus contributing an additional 29,000 gallons per day of flow to the Wastewater Facility.

A handwritten signature in black ink that reads "Steven C Dolloff". The signature is written in a cursive style with a large, stylized "S" and "D".

Steven Dolloff  
Superintendent, Wastewater Treatment Facility

MINUTES OF THE 196TH TOWN MEETING OF THE TOWN OF MILFORD

MARCH 14, 1989

Town Meeting for the election of Town officers and School officers opened at the Milford Area Senior High School auditorium at 12:00 o'clock noon by the reading of the Town Warrant by Moderator Robert Philbrick.

Motion was made and seconded to close the polls at 8:00 o'clock p.m., and voted unanimously in the affirmative.

Election officers present: Moderator, Robert Philbrick; Supervisors of the Checklist, John Farwell and Elisabeth Blacklock; Town Clerk, Wilfred Leduc.

Moderator Philbrick called to order the 196th Town Meeting of the Town of Milford at the Milford Area Senior High School auditorium at 6:40 p.m. Present for the meeting were Assistant Moderator, Charles Ferguson; Board of Selectmen, Chairman Rosario Ricciardi, Vice Chairman Richard Mace, Vivian Barry, Peter Leishman and Richard Medlyn; Town Administrator, Lee Mayhew; Selectmen's Secretary, Joan Deguise; Director of Public Works, Robert Courage; Superintendent of Wastewater Treatment Plant, Steven Dolloff; Chief of Police, Steven Sexton; Fire Chief, Richard Tortorelli; Planning Director, Mark Fougere; Town Clerk, Wilfred Leduc; Deputy Town Clerk, Nancy Schooley; Budget Committee, Chairman Michael Deasy, Leonard Harten, James Cain, Kenneth Apicerno, Augusta Law, Wesley Stinson, John Ulricson, Stephen Turner and Marty Wilde.

Minutes were recorded by Nanette Rogers, assisted by Nancy Schooley; Audio assistance was provided by Bert McGrath.

The Moderator asked the assembly to rise and remain standing for the opening ceremony. The invocation was delivered by Reverend Donald Brown of the First Baptist Church of Milford. The assembly was led by Moderator Philbrick in the Pledge of Allegiance.

Moderator Philbrick announced some housekeeping rules. Each voter must wear a green sticker in order to speak and vote. The sticker indicates the person as being a resident of the Town of Milford. Anyone wishing to speak shall first stand, be recognized, utilize a microphone and state his/her name. No motions for reconsideration will be entertained except immediately following the original vote. It was intended to discuss the articles in the following order: 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 3, 4, 5, 16, 17, 18, 19, 20, 31, 32, 33, 34, 35, 42, 36 (Town Budget), 25, 21, 22, 23, 24, 26, 27, 28, 29, 30, 37, 38, 39, 40, 41, 43 and 44. Articles 1 (election of officers) and 2 (zoning amendments) were voted by ballot prior to the business meeting.

Moderator Philbrick took a few moments to recognize two of Milford's fine Senior Citizens, who without fail attend both the Town and School Meetings every year. They being Guy Fitch, 93 and Carl Holland, 87.

Moderator Philbrick stated the meeting would begin with Article 6 and to follow with the lighter articles until after the polls being closed at 8:00 p.m. in which the heavier articles would follow.

ARTICLE 6. It was moved, seconded and voted in the affirmative to authorize the prepayment of taxes and authorize the Collector of Taxes to accept payments in prepayment of taxes, such procedures being in accordance with RSA 80:52-a, or take any other action relative thereto.

ARTICLE 7. It was moved by Chairman Ricciardi, seconded by Chairman Deasy, and voted in the affirmative to raise and appropriate the sum of \$13,000, said sum being the local share required by the N.H. Department of Transportation, for the reconstruction of the railroad crossings on Cottage Street, it being noted that the total cost of the project is \$130,000, or take any other action relative thereto.

ARTICLE 8. It was moved by Chairman Ricciardi, seconded and almost unanimously defeated to raise and appropriate the sum of \$58,000 to purchase a new 1989 Street Sweeper, this to replace the Department of Public Works 1977 Mobile Sweeper, or take any other action relative thereto.

Chairman Deasy stated the Budget Committee did not recommend passage of this article. They had been advised the estimated cost for repairing the current sweeper would be \$10,000.00. The estimated annual maintenance cost of a sweeper, new or old, is \$5,000.00. The Budget Committee proposed an additional \$10,000.00 to the Public Works Budget if the article is defeated. Steven Takacs stated we should stop spending money we don't have. Richard Hillman urged voters to distinguish the essentials and vote likewise. Ernest Barrett asked Bob Courage whether \$10,000.00 would definitely carry the sweeper another two years. The reply was he believed it would, but there could be no guarantees.

ARTICLE 9. Motion made by Chairman Ricciardi, seconded by Chairman Deasy and unanimously voted in the affirmative to raise and appropriate the sum of \$31,000 for the purpose of resurfacing the following:

Wilton Road	2,500 feet
West Street	700 feet (section)
Amherst Street	450 feet (section)
Nashua Street	900 feet (section);

and to authorize the Board of Selectmen to withdraw and expend the sum of \$31,000 from the established Highway Capital Reserve Fund established for this purpose, or take any other action relative thereto.

ARTICLE 10. It was amended by Ernest Barrett, seconded and almost unanimously voted in the affirmative to raise and appropriate the sum of \$15,000 to add to the established Capital Reserve Fund for the construction and/or reconstruction of Class IV and Class V Highways, or take any other action relative thereto. The original article requested to raise and appropriate \$25,000.00 which the Budget Committee was not in favor of. They feel there are enough funds available for the average annual maintenance of the highways even after the passage of Article 9. Ernest Barrett's argument was we should keep adding money to this reserve so in the case of a major project in the future we would not be burdened.

ARTICLE 11. It was moved by Chairman Ricciardi, seconded by Chairman Deasy and almost unanimously voted in the affirmative to raise and appropriate the sum of \$21,800 for the purpose of purchasing a 1989 rubber tire four wheel drive loader backhoe, this to replace the Department of Public Works 1984 Ford Model 555 loader backhoe; the cost of this loader backhoe to be shared between the Water Department and the Town; or take any other action relative thereto.

Chairman Deasy stated the Budget Committee supports the article and because the way the equipment will be used, half the total cost will go directly on the tax rate and the other half will be included in the Water Department's Budget, so in essence will be paid by the water users. John Burke directed a question to Robert Courage, Director of Public Works, as to whether this is a critical item. Bob Courage explained that we now own two backhoes, one of which works full time at the transfer station packing rubbish and the other is used by the Water and Sewer Department for street work. A backhoe is kept two years for the street work and then sent to the transfer station for another couple of years, at which time it is then traded in at a descent value. Ernest Barrett supported Bob Courage and the Budget Committee.

ARTICLE 12. It was moved by Chairman Ricciardi, seconded by the Firewards and almost unanimously defeated to raise and appropriate the sum of \$20,000 for the total replacement of the Milford Fire Station heating system, or take any other action relative thereto. (By request of the Board of Firewards.)

Chairman Deasy explained the Budget Committee did not recommend passage of this article since it had been defeated last year due to insufficient evidence of other alternatives explored, and feels the same way this year. Fire Chief Tortorelli stated they had explored other alternatives and have presented a bid which is even lower than the previous year's. He also added that \$800.00 was spent on repairs this past year to the current system, and will probably require more in the years to come until the system quits. When that time comes, we will have no alternative but to install a new system. A suggestion was made to shut off vents in the areas which do not require heat.

ARTICLE 13. It was moved and seconded by the Board of Firewards and almost unanimously defeated to raise and appropriate the sum of \$50,000 to be paid into the Capital Reserve Fund authorized for the purpose of financing the acquisition of fire trucks and the equipping thereof, or take any other action relative thereto. (By request of the Board of Firewards.)

John Gaspar, Board of Firewards, stated they're primarily asking for the money to spread it out. The basic plan is for the replacement of apparatus over the years. If there is not money in the Capital Reserve Fund, they will have to ask for a bond issue. In 1990 they will be requesting the replacement of the ladder truck, which is estimated to cost \$350,000.00.

ARTICLE 14. It was moved by Chairman Ricciardi, seconded by Chairman Deasy and unanimously voted in the affirmative to authorize the Board of Selectmen to execute an agreement between the Town of Milford and Northeast Hydro-development Corporation, for the purchase of electricity generated from the hydroelectric plant to be developed on the dam below the Swing Bridge, said

electricity to be purchased for use in the Waste Water Treatment Facility or other municipal facility, or take any other action relative thereto. It was explained that if the article passes, the corporation will pay for any repairs to the McLane dam, installation of equipment, poles, lines or acquisitions of easements in connection with the contract. The Town and sewer users will save money if this article passes and the Treatment Plant will benefit also.

**ARTICLE 15.** It was moved by the Chairman Ricciardi, seconded and almost unanimously defeated to raise and appropriate the sum of \$8,500 for the purpose of contracting with Nashua Regional Planning Commission to identify impacts on schools, infrastructure, and other related services caused by the development and generate ordinances that would impose a fee representing such impact(s) on the development. Said contract to be overseen by a seven member committee, appointed by the Moderator, and consisting of at least two members of the Planning Board and two members of the School Committee, or take any other action relative thereto.

It was moved and seconded by the Board of Selectmen and unanimously voted in the affirmative to allow Mark Fougere, a non-resident of Milford, to speak. Mark explained before the House there is an enabling legislation to allow cities and towns to charge impact fees. A lot of support for this legislation has been expressed and it could be adopted by June if passed by the Senate. He also stated impact fees reduce the cost of growth on the tax payer and right now we do not have the authority to charge these fees, but urged for passage on this article. Chairman Deasy recommended we wait until the legislation is passed rather than take a chance now. Selectman Medlyn encouraged passage of this article. He said if the article was not passed tonight, we would have to wait at least another year to develop proper school impact fees. He proposed to mark this warrant article money not be used until proper legislation is passed. Ernest Barrett stated this goes on our tax rate whether it is used or not used, and urged voters to defeat the article.

**ARTICLE 42.** It was moved by Wesley Stinson, seconded and almost unanimously defeated to establish a study committee to research alternate forms of government. Said committee to report to the Board of Selectmen the results of this research, and any recommendations no later than October 16, 1989. Said committee to be appointed by the Board of Selectmen and to include no less than (7) seven residents of the Town of Milford. (By Petition)

Richard Hillman requested that Moderator Philbrick comment on this article. Moderator Philbrick's opinion is its a waste of time, effort and money and "if it ain't broke, don't fix it". He sees no reason to adopt a new form of government.

**ARTICLE 21.** It was moved by Chairman Ricciardi, seconded by Chairman Deasy and unanimously voted in the affirmative to require the Conservation Commission, (prior to any Town Meeting vote to dispose of property acquired by Tax Collector deed), to study said property and recommend to the Town Meeting if such property should be retained by the Town in accordance with New Hampshire Revised Statutes 80:42-a, or take any other action relative thereto. (By request of the Conservation Commission)

Russ Monbleau explained this is a no cost warrant. In recent legislation it

has been mandated to the Town they may dispose of property for tax purposes. The Conservation Commission is asking the land be reviewed in respect to current conservation plan and then make recommendation to town body, and the Town Meeting decide whether to dispose or retain the property.

ARTICLE 22. It was moved by Chairman Ricciardi, seconded and almost unanimously defeated to raise and appropriate the sum of \$5,000.00 for the purpose of beginning annual work on the upgrading, beautification, and revitalization of the Town's part of the Oval, and downtown area, such annual work to center on the areas of sidewalks, curbing and curb cuts, benches and the like as developed by the Board of Selectmen, Director of Public Works, and the Downtown Merchants Association. If approved, such appropriation is to be carried as part of the annual Selectmen's Budget; or take any other action relative thereto.

Chairman Deasy advises there are no long term goals or plans and therefore recommends the article be defeated. Chairman Ricciardi stated the sidewalks are falling apart and it's their intent to raise a little bit of money each year until completed.

ARTICLE 23. It was moved by Chairman Ricciardi, seconded by Chairman Deasy and unanimously voted in the affirmative to authorize the Selectmen to borrow money in anticipation of taxes of the current fiscal year, and to issue notes therefore in accordance with RSA 33:7.

Moderator Philbrick declared the polls closed at 8:00 p.m. Tellers were requested to report to the stage under the direction of Assistant Moderator Ferguson, to begin counting the ballots. The counters were directed to count the zoning amendments first as this will affect a decision of a later article.

ARTICLE 3. It was moved by Merv Newton, seconded and unanimously voted in the affirmative to consolidate Articles 3, 4 and 5. It was amended by Ernest Barrett, seconded and voted in the affirmative to raise and appropriate \$1,118,566 for constructing and extending the sanitary sewer system to the following locations:

South Street, 1200' of 15" pipe	\$116,347
Summer Street, 1700' of 8" pipe	189,156
Shady Lane, 370' of 8" pipe	40,068
Birch Lane, 325' of 8" pipe	39,680
Mayflower Drive, 915' of 8" pipe	85,190
Falconer Avenue, 770' of 8" pipe	82,065
Merrill Street, 296' of 8" pipe	27,100
Wellsley Drive, 505' of 8" pipe	50,041
Georgetown Drive, 1270' of 8" pipe	134,655
Ridgefield Drive, 2200' of 8" pipe	354,264

to authorize the Selectmen to raise this appropriation by borrowing \$1,118,566 under the Municipal Finance Act, to be repaid in not less than 20 years, and issue bonds or serial notes therefore to be repaid from sewer users fees and such betterment assessments as the Town shall be legally entitled to assess against those property owners which will benefit from such extensions, provided that such bonds or notes shall be general obligations of the Town, and all property that is to be served by these

extensions must hook up to the extension within one year of the initial operation of the new lines, and to authorize the Selectman to contract for and expend any federal or state aid for the project and to take all other action necessary to carry out the project.

Chairman Deasy explained that if this article is passed, the real impact would be on the sewer users; there would be no direct impact on the tax rate. All principal and interest will be added to the sewer rate and all sewer users will directly pay for the cost of these extensions. This would include the existing users plus the 126 units which will be added to the current system. The estimated increase on the sewer rate in 1990 will be between .45 and .75. Because of the nature of bond issues, that increase would decrease slightly every year over the life of the bond. The Budget Committee is opposed to this article, but not on merits of whether these areas should be sewered, because they've heard good reasons why they should be, but because they feel the proposed method of funding is unfair and inequitable. He noted that if these articles are passed, Article 25 can be reduced by \$7,000.00.

Vivan Barry stated the new users impact and hookup charge will range between \$3,000 and \$5,000 for each household. She feels we have to support main functions as they pertain to the health and welfare in running the Town and this article is necessary as well as a moral issue. She urged voters to pass this article.

Michael Walsh addressed a question as to whether the value of these homes would increase by the hook up. Chairman Leishman answered yes to that question and explained that a home served by a sewer system has more value than one with a leachfield. He also stated an appropriate assessment should be made next year to reflect the increase.

Jay Chrystal of the Chemserve Company was contracted by residents of Summer Street to evaluate the situation. His opinion is there's a significant impact of leaching fields which could have severe health problems on any person or animal coming in contact with any of the drainage areas or ground water seeping from the area and going through these drainage areas.

Ken Miles agrees the health problem has been recognized but senses the whole issue centers around funding. He further states health hazards which impact the entire town, to be alleviated on funding provided by simply the sewer users, does not seem to be equitable.

At 8:45 p.m. Moderator Philbrick opened the polls for ballot voting on Article 3. A Yes/No ballot was used for this ballot. This bond issue article requires a two-thirds majority vote for passage. The polls will remain open for one hour. The meeting was adjourned for a short recess.

At 9:08 p.m. Moderator Philbrick declared the meeting to come to order.

**ARTICLE 36.** It was amended by Chairman Deasy, seconded and almost unanimously voted in the affirmative to raise and appropriate the sum of \$5,557,687 to defray the Town charges for the period of January 1, 1989 to December 31, 1989, which sum represents a reduction of \$130,239 from the posted budget request, said reductions to be made in the following categories or line items:

General Government	\$75,548
Police	36,969
Emergency Management	149
Building Inspection	782
Planning	1,938
Welfare	5,343
Social Service Grants	1,988
Parks & Playgrounds-Recreation	2,221
Library	5,301

for a total of \$130,239, or take any other action relative thereto.

Chairman Deasy explained the rationale behind this decision. The Budget Committee feels this is the first step towards learning as a Town to live closer to our means and closer to the means of the citizens. Basically what the Budget Committee did was take the actual amount expended by given department or given category in 1988 and added 8% to that, and then added additional amounts for new items found to be justifiable and reasonable. Some lines or debts had no cuts because they were either going up less than 8% or they represent areas where there is no choice. These areas are the debt service, the Communications Center, the Transfer Station and insurance and fringe benefits. He also commented that it wasn't easy for the Committee to arrive at this decision, but feels the Town could live with it.

Sharon Holcombe presented an amendment which would reduce the Town Budget appropriation by 5% from \$5,005,090 which it was in 1988 to \$4,755,050 for 1989. This amendment was later defeated. Several Residents spoke in favor of the Budget Committee's proposed amendment. Richard Hillman of the Milford Taxpayer's Association urged voters to pass this amendment and stated it was within one tenth (1/10) of one percent (1%) where they would like to have seen it cut. Robert Burke advised we have to be careful how we make budget cuts so not to hurt our vital services such as the ambulance, police and fire departments.

The budget was approved as amended and is broken down as follows:

General Government	\$1,095,424
Public Safety	
Police	733,068
Fire	144,031
Communication Center	114,837
Ambulance	87,082
Emergency Management	5,131
Building Inspection	32,529
Other Public Safety	96,335
Public Works	
Administration	77,026
Highways & Streets-Summer	273,138
Highways & Streets-Winter	210,370
Storm Drainage	18,596
Town Buildings & Grounds	55,426

Cemeteries	59,413
Transfer Station	962,100
Street Lighting	51,000
Planning & Development	
Planning	75,930
Zoning Board of Adjustment	6,890
Other Planning & Development	11,871
Human Services	
Health	9,935
Welfare	24,222
Social Service Grants	12,787
Culture & Recreation	
Parks & Playgrounds	22,417
Parks & Playgrounds-Recreation	44,453
Library	221,336
Civic Promotion	12,200
Other Charges	
Debt Service	1,100,140

At 9:53 p.m. Moderator Philbrick declared the polls closed on Articles 3, 4 and 5. Also the results of the ballot votes on Article 2 (zoning amendments) were announced.

Richard Ball stated that we have to pay for Town services and when you cut budgets you have to live with less services. He urged voters to support the Budget Committee. Mike Homola stated that town employees do not do twice the work as any other person and should only get a 4% to 5% pay raise instead of 8%. Ernest Barrett advised that a cut across the bottom line needs rational thinking.

At 10:05 p.m. Moderator Philbrick announced the results of the ballot voting on Article 3. A total of 511 ballots were cast; two-thirds required for passage is 342.

*YES	371	NO	140
------	-----	----	-----

The article was passed as amended.

ARTICLE 2. A total of 1,201 ballots were cast. The results for the zoning amendments are as follows:

BALLOT VOTE NO. 1. Are you in favor of Amendment #1 as proposed by the Board of Selectmen for the Town of Milford Zoning Ordinance as follows:

To amend its current Zoning Ordinance to permit the suspension of existing height, density, parking and frontage requirements as they apply to Map 26, Lot 99 and Lot 168 in order to facilitate a proposal (and only in the event of an approval) of the site for elderly housing under the Farmers Home Administration, said housing not to exceed fifty-four (54) units, forty-five (45') feet in height and will provide a minimum of thirty-five (35) parking spaces.

BALLOT VOTE NO. 5. Are you in favor of Amendment #5 as proposed by the Board of Selectmen for the Town of Milford Zoning Ordinance as follows:

To amend Article VII, EXISTING MOBILE HOME PARKS Paragraph 7.050 by adding the following section:

7.052 Allowable Uses in the Industrial District by Special Exception

Any manufactured housing park in existence at the time of passage of this Ordinance that has a minimum of thirty (30) units may expand subject to the limitations contained herein and provided the Board of Adjustment has approved a Special Exception for such expansion pursuant hereto:

The Board of Adjustment in determining whether such a park is entitled to a Special Exception to expand shall apply the following criteria:

- (a) The proposed shall only apply to a park with municipal water and sewer service or one which has received permission from the Selectmen to construct such water and sewer services at the park owner's expenses;
- (b) The proposed shall include a commitment to improve all existing and contemplated roads within the park to such standards as required by the Selectmen for current road improvements;
- (c) The Board of Adjustment shall determine that there exists or will be provided, parks, playgrounds, open green space or other amenities sufficient to provide for existing and proposed occupants of the park;
- (d) The Board of Adjustment shall determine the extent to which the park shall be allowed to expand provided that they shall not approve any expansion that will result in a total park density greater than the existing multi-family housing density in the Town;
- (e) The Board of Adjustment shall consider the proposed expansion and may impose any reasonable conditions on the grant of the Special Exception which are, in the judgment of the Board of Adjustment, necessary to insure that the proposed expansion meets the above criteria, the general criteria for a special Exception (set forth in Article X, Para. 10.020 of the Ordinance) and also provide for the safety of existing and further occupants in terms of fire safety, flooding, traffic and any other appropriate considerations.

It is understood that once a Special Exception is granted hereunder the applicant will thereafter present a site plan to the Planning Board in accordance with existing Site Plan review regulations. All required improvements will be bonded as normally required.

A joint meeting of the Planning Board and Board of Adjustment is permissible if said Boards concur.

## PETITION

To see whether the Town will vote to change the classification of the zoning district described below currently zoned Residence "R" so that it is changed to Industrial. The district to which this change from Residence "R" to Industrial shall apply is described as follows:

The area in the Town of Milford currently zoned as Residence "R" which is located directly across North River Road from the current Milford Transfer Station Lot #8-19, and consists of Lot Numbers 8-48, 8-49, 8-50 and 8-51 as shown on Map 8.

YES 212

\*NO 838

ARTICLE 16. It was amended by Selectman Barry, seconded by Russ Monbleau and voted in the affirmative to raise and appropriate the gross sum of \$65,000 to the conservation fund as authorized by NH RSA 36-A:5 to be used for the acquisition of a forty-five acre, more or less, parcel of land located in the Green Belt area on Savage Road, in the name of the Town, and to further authorize the Selectmen to accept private donations of land, interest in land or money for the purpose of contributing to the local matching portion required for acquiring conservation land or interest in land and other costs associated therewith for permanent conservation use under the N.H. Land Conservation Investment Program (LCIP) NH RSA 221-A, and authorize the Selectmen to apply for and accept the state matching funds under the LCIP in an amount to \$250,000 for the purpose of acquisition of said property and to authorize the Conservation Commission to apply the December 31, 1988 fund balance of their land acquisition fund towards the acquisition of this property. This appropriation is contingent upon the receipt of state funds in a like amount and/or private donations exclusively, or take any other action thereto. (By request of the Conservation Commission)

Selectperson Barry explained the LCIP was funded a little over a year ago with \$20,000,000 for the purpose of conserving land in New Hampshire. \$13,000,000 has already been allocated leaving a balance of \$7,000,000 for local conservation initiative projects. There are three application periods, two of which have already lapsed with one remaining. LCIP funds 50% of approved, qualified projects after local communities vote to cover their half. The Burns property on Savage Road already meets the LCIP criteria and preliminary qualifies. The Town owns 196 acres south of this property and 25 acres plus a conservation easement north of it. The Burns property would connect the two which are part of an ongoing 25 year plan.

Russ Monbleau simply stated residential growth is a tax loser; Commercial-Industrial growth is a gainer. The Burns property has many unique characteristics of which is a developer's dream. There is no swamp, it has 600' of frontage on Savage Road and has an additional point of access on Whitten Road. If this property is not purchased for conservation purposes, and is developed, it will have a negative tax impact which will affect us year after year. He urged passage of this article for three reasons: (1) he believes there will never be another chance for the Town to purchase conservation land for less than \$4,000 per acre, (2) this will help to control and regulate the tax rate and (3) it will keep the area rural.

ARTICLE 17. It was amended by Russ Monbleau, seconded and unanimously

defeated to raise and appropriate the sum of \$355,000.00 for the acquisition of a forty-five acre, more or less, parcel of land located in the Green Belt area of Savage Road, said appropriation to be offset by the application of the December 31, 1988 Conservation Commission fund balance, or take any other action relative thereto. (By request of the Conservation Commission.)

Russ Monbleau explains this is a provisional article in the event we do not win the LCIP funding. It is based on a different negotiation with Mr. Burns which would leave him with lifetime cutting rights to the land and a renegotiated price of \$350,000 which the Town will bear the full cost of. The tax stabilization argument is still valid, the only difference being this article would be paid back in a year and a half opposed to six months.

Ernest Barrett is not in favor of this article since we already passed Article 16 which involved the same parcel of land. He suggested that a special town meeting be called if the LCIP funding falls through. Chairman Deasy stated the Budget Committee does not recommend passage of this article because it is not favorable to the Town as was Article 16.

Elisabeth Blacklock amended the article to read money to be raised will be paid by revenue to the Town from changes in current use funds. Her amendment was defeated. Russ Monbleau advised that Blacklock's amendment would not be appropriate because it is not predictable, it would not be a sufficient amount and we would not have it in time. He did agree to hold a special town meeting if this article is defeated and the LCIP funding falls through. Ernest Barrett did not agree with Blacklock's amendment. He stated that it still puts money on the tax rate and its not responsible financing.

ARTICLE 18. It was moved by Chairman Ricciardi, seconded by Chairman Deasy and unanimously voted in the affirmative to raise and appropriate the sum of \$5,000.00 for the Ccnervation Commission to continue its work in 1989, or take any other action relative thereto. (By request of the Conservation Commission.)

ARTICLE 19. It was moved by Chairman Ricciardi, seconded by Chairman Deasy and unanimously voted in the affirmative to authorize the Conservation Commission to retain unexpended portion of its annual appropriation; said funds to be placed in a special conservation fund authorized by New Hampshire Revised Statute 36-A:5; and in accordance with New Hampshire Revised Statute 41:29; or take any other action relative thereto. (By request of the Conservation Commission.)

ARTICLE 20. Article, requesting \$25,000.00 to be added to a fund for the acquisition of property for conservation purposes, was withdrawn by the Conservation Commission.

ARTICLE 25. It was amended by Chairman Ricciardi, seconded and almost unanimously voted in the affirmative to authorize the following in order to implement a proposal considered by the Board of Selectmen, to exchange existing Town Barn land for a commitment to construct a new Town Barn on the "Water Works" property so called, on South Street; and in this regard the following is specifically authorized:

- The Selectmen are authorized to convey the existing Town Barn property consisting of the eastern one half of lot 168 and all of lot 99 on Tax Map 26 at the intersection of Pine Street and Bridge Street to such suitable party as they may designate in exchange for a binding, properly secured agreement, from such party to construct a building of an approximate value of not less than \$350,000, pursuant to specifications established by the Board of Selectmen on the "Water Works" property on South Street which building will be used as a new Public Works Garage;
- The portion of Pine Street from the intersection of Pine Street and Bridge Street to the intersection of the south line of lot 99 on Tax Map 26 is hereby abandoned and discontinued in order that the two parcels above and the abandoned portion of Pine Street can be made one parcel;
- It is understood that a condition of the conveyance of the parcels by the Board of Selectmen together with the abandonment of the road shall allow the grantee to make application for and construct an elderly housing project pursuant to zoning amendment permitting same;
- Raise and appropriate the sum of \$84,000 for certain cost items necessary for the Town to accomplish as part of the new Public Works Garage, such items to include but are not limited to the following; demolition, site filling, drainage, water, utilities, paving, engineering and salt shed construction;
- Or take any other action relative thereto.

Selectman Leishman stated the Board is behind this article because they have recognized the need for elderly housing and the need to move the Public Works Garage from downtown to South Street. Bob Courage and numerous staff members reviewed the proposal. Several areas of land owned by the Town were looked at (the Waste Water Treatment Plant, Town Dump, Mullen Property, Elm Street Property and Souhegan Street). They looked at sites currently owned by the Town for cost advantages towards the taxpayer. He further stated advantages if this article is passed. They are (1) the need for elderly housing would be taken care of; (2) the Town would receive \$37,000 in additional tax revenue, which this piece of property does not at present do so; and (3) the Town would also receive \$28,600 from water and sewer impact fees.

Chairman Deasy stated the Budget Committee recommends a no vote on this article. Their main concern is whether the swap of the land for the garage is a reasonably equivalent exchange in value. The appraisal for the property was done prior to Town Meeting; therefore the value is appraised at its highest and best use, which is a commercial use. The appraisal also points out the value of this property for high density; (residential use is substantially more than \$365,000). The reports suggest that it might be worth as much as \$780,000. The Committee does not feel good about this number because there is not a lot of support for it. They are recommending a no vote because they feel the Town does not have enough information to make a reasonable decision.

Ernest Barrett asked if that spot zoning change could be challenged in court, if brought to court. William Drescher, Town Counsel, clarified that it is not spot zoning. The reason is that we are not adding a use of inconsistency with other properties around the piece in question. What we are doing is relieving this particular lot of density and height restrictions with the zoning amendment.

Ernest Barrett moved this article be voted on by a Yes/No ballot. The motion was defeated.

Several residents spoke in favor of this article. They feel it is an excellent opportunity for the Town.

At 10:47 p.m. Moderator Philbrick announced the results of the ballot voting for town officers (Article 1). There were a total of 1,212 ballots cast; the results are as follows:

Town Clerk - Three Years	
*Wilfred A. Leduc	1,111
Town Treasurer - One Year	
*Septima Gaidmore	1,072
Trustee of Trust Funds - Three Years	
*Richard P. Fisk	1,048
Selectmen - Three Years	
*John E. Burke	611
May C. Gaffney	267
Kenneth P. Nelligan	92
Wesley R. Stinson	108
Selectmen - Two Years	
*Peter Leishman	877
Kevin Taylor	291
Fire Warden - Three Years	
*James Wetherbee	1,054
Library Trustee - Three Years	
*Denise Johnson	862
*Ivy Vann	749
Library Trustee - Two Years	
*Atilla P. Farkas	1,003

\* Deemed elected by Moderator Philbrick.

QUESTION NO. 1 Shall the provisions of Ch. 287 R.S.A. relative to playing of Beano be adopted in this Town? (Do you want to allow playing of Beano?)

*YES	735	NO	252
------	-----	----	-----

At 11:15 p.m. Moderator Philbrick announced the results of the ballot voting for school officers (Article 1). A total of 1,214 ballots were cast. The results are as follows:

Moderator - One Year	
*Robert D. Philbrick	1,046
Clerk - One Year	
Sandra Richard	13
Wilfred Leduc	6

Scattered votes	
Treasurer - One Year	
*Francis W. Mistrangelo	973
School Board Member - Three Years	
Richard C. Ball	525
Paul Burkhardt	517
*Emma B. Wheeler	623
*John Wilde	551

\* Deemed elected by Moderator Philbrick.

Chairman Ricciardi presented Appreciation Certificates to Anne St. Cyr and to Richard St. Cyr who have served on the Street Numbering Committee for eight and four years respectively.

Selectman Leishman presented a tribute to Richard Medlyn who served the Town with devotion, dedication and honesty as Selectman.

It was moved by Mike Homola, seconded and almost unanimously voted in the affirmative to limit all further discussion to 2 minutes per person.

ARTICLE 31. It was moved by Chairman Deasy, seconded by Chairman Ricciardi and almost unanimously voted in the affirmative to raise and appropriate the sum of \$60,000 for the purpose of buying New Hampshire Retirement System prior year employer credits and a portion of employee credits for those present town employees, who agree to pay that portion of the employee credit equal to the total amount not deducted from such employee's wages and who were not enrolled into the mandatory retirement system, at the proper time by the Town, said enrollment being authorized by the Town Meeting of March 1946, such purchase of prior year credit in order to establish the employees proper longevity and as appropriate, vesting rights; or take any other action relative thereto.

Chairman Deasy explains that in the 1950's or 60's through 1985, Selectmen were under the impression that membership in the New Hampshire Retirement System was optional. What being in the retirement system means is the Town has to pay a percentage of the employees salary to employers share of retirement and the employee puts in a share. Roughly a third of the total comes from the Town and two thirds from the employee. Since this has not been paid, a liability has built up for approximately 17 current Town employees. The new total as of the end of this month is \$170,855.49. If the Town had to pay for what it didn't pay, plus the interest it would have earned, the Town's share would be \$62,000 and the employees share would be \$109,000. The Committee feels that its wrong for an employee to have to pay a sum in excess of \$10,000 (which for most, is the case). So what the Committee is proposing is that the Town pay the Town share, and the Town pay that portion of the employees share that is attributable to the interest it would have earned. It would be broken up to appropriate \$60,000 this year and \$60,000 or \$70,000 next year. The employee will have to put in the part that would actually have been withheld from their wages. He also advised there had been one law suit which resulted in the Belknap County paying 60% and the employees paying 40%. He added this doesn't make law and it doesn't make precedent, but added there is a law currently in legislation which would require the Town to pay 50%. The Committee feels that the Town has some obligation here and this is a reasonable compromise.

Mark Weinstein asked what other costs the Town will incur if the amount is spread over 2 years instead of 1. Chairman Deasy replied that because the additional cost keeps changing due to interest, there may be amounts of \$20,000 or \$30,000 to be appropriated in a third year. Ernest Barrett's concern was if we make contributions for both the Town and the employee share, and an employee decides to leave, what would happen to the contribution made into the fund for the employees share. Chairman Deasy stated an employee leaving, has the option to withdraw what he contributed, but is not entitled to the employer's share. Ernest Barrett also addressed the minutes of Town Meeting March 13, 1956 modifying the retirement system.

ARTICLE 26. It was moved by Chairman Ricciardi, seconded by Chairman Deasy and unanimously voted in the affirmative to raise and appropriate the sum of \$544,810 to operate and maintain the Water Department; said appropriation to be offset by income from the Water Users of an equal amount; or take any other action relative thereto.

Robert Burke asked why this amount keeps going up. Chairman Deasy's answer was the Pennichuck Pipeline is completed so we have minimum monthly payments to make. Mr. Burke commented he thought this was to be used as only a backup water supply. Chairman Deasy stated their plan is to open it up once a month so it won't become stagnant.

ARTICLE 27. It was moved by Chairman Ricciardi, seconded by Chairman Deasy and voted in the affirmative to raise and appropriate the sum of \$826,428 to operate and maintain the Wastewater Treatment Plant and Sanitary Sewer Collection System; said appropriation to be offset by income received from a sewer users charge; or take any other action relative thereto.

ARTICLE 28. It was moved by Chairman Ricciardi, seconded by Chairman Deasy and almost unanimously voted in the affirmative to raise and appropriate the sum of \$5,000 to be put into the expendable Town Trust Fund authorized for the 200th birthday celebration of Milford in the year 1994; said funds to accumulate from year to year until the Bicentennial, and are for payment of related costs associated with parade, pageants, commemorative coins, musicians, entertainment, prizes, fireworks, and other allied programs developed by the Bicentennial Committee; or take any other action relative thereto. Steven Takacs amended the article to read \$2,500; the amendment was defeated.

ARTICLE 29. It was moved by Chairman Ricciardi, seconded by Chairman Deasy and unanimously voted in the affirmative to raise and appropriate the sum of \$44,557 for the purchase of a 1989 Type 2 Ambulance, and the equipping thereof for the Milford Ambulance Service; and to authorize the Selectmen to dispose of, by trade-in allowance the 1979 Ambulance, and to further authorize the withdrawal of \$41,348 from the Capital Reserve Fund established for such; or take any other action relative thereto. (By request of the Ambulance Directors.)

Atila Farkas asked why this budget had gone up 86% since last year. Deasy explained that last year there was a warrant article to pay for fulltime attendants for one year. This year, that money is in the budget so actually it is not up 86%.

ARTICLE 30. This article was withdrawn by the Ambulance Service

ARTICLE 32. Motion by Chairman Deasy, second by Chairman Ricciardi and unanimously defeated to raise and appropriate the sum of \$7,200 in order to contract with the New Hampshire Municipal Association for a Pay and Classification Study for the Town of Milford, or take any other action relative thereto. Chairman Leishman stated the Board feels they have done a fairly good job in reviewing of salaries and when the Budget Committee recommended a study of such, the Board went along with it reluctantly. Several residents spoke unfavorably of this article since it would probably be a waste of money and would more than likely cause problems.

ARTICLE 33. Amendment by Russell Kincaid, second by Chairman Deasy and almost unanimously voted in the affirmative to see whether the Town in the discharge of its responsibility under RSA 149-M:13 will vote to implement a program for the recycling of solid waste and to that end adopt the following by-law to carry out that purpose:

#### MANDATORY RECYCLING

A BY-LAW ESTABLISHING MANDATORY RECYCLING IN THE TOWN OF MILFORD; ESTABLISHING RULES AND REGULATIONS FOR SEPARATION OF SPECIFIC MATERIALS FROM THE SOLID WASTE STREAM FOR THE PURPOSE OF RECYCLING, PROMULGATING RULES AND REGULATIONS FOR THE COLLECTION OF SAID SPECIFIC MATERIALS AND PRESCRIBING PENALTIES FOR THE VIOLATION THEREOF:

WHEREAS, pursuant to the authority vested in the Town of Milford by RSA 31:39 and 149-M:13 (II).

WHEREAS, the separation and removal of certain designated materials for purpose of recycling, will serve the public interest by reducing solid waste and conserving our material resources;

WHEREAS, it is necessary to establish the rules and regulations for the separation, collection and disposal of said designated acceptable materials & directives of Town Meeting as well as the responsibility of the Town under RSA 149-M:13; and

NOW, THEREFORE, BE IT ORDAINED by the Town of Milford, in the County of Hillsborough and State of New Hampshire that Mandatory Recycling, is hereby established as a program for the mandatory separation of certain recyclable materials from garbage or rubbish by residents of the Town of Milford, and the collection of these recyclables.

#### SECTION I: DEFINITIONS

1. "Paperstock Recycling Materials" shall mean the following recyclable materials:
  - a. NEWSPAPERS - the term newspapers as used herein shall be deemed to include paper of any type commonly referred to as newsprint distributed at stated intervals usually daily or weekly, having printed thereon news and opinions and containing advertisement & other matters of public interest.

Expressly excluded, however, are all magazines or other periodicals, as well as all other paper products of any nature whatsoever.

- b. HIGRADE PAPER - term higrade paper as used herein shall be deemed to include office, copy paper, computer printout paper, bond paper, and typing paper.
  - c. MIXED PAPER - the term mixed paper as used herein shall be deemed to include any combination of newspaper, higrade paper, "junk mail", and advertisements.
  - d. CORRUGATED CARDBOARD - term corrugated cardboards used herein shall include cardboard containers used primarily for for packaging, boxing and/or transporting of products of any type.
- 2. GLASS CONTAINERS - the term glass as used herein shall be deemed to include all bottles and jars made entirely of glass and used in the storage of food and beverages. Specifically excluded are blue and flat glass commonly known as window glass, light bulbs & fixtures.
  - 3. ALUMINUM BEVERAGE CANS - the term aluminum as used herein shall be deemed to include only those containers made entirely of aluminum and used solely for the packaging of beverages.
  - 4. METAL - the term metal as used herein shall be deemed to include all cans, other than aluminum, consisting entirely of steel, tin or bi-metal; and used in the storage of food and beverages.
  - 5. SCRAP METAL - the term scrap metal as used herein shall include all discarded products made of steel, aluminum or other materials used for any purposes, excluding food and/or beverage packaging.
  - 6. PLASTICS - the term plastics as used herein shall be deemed to include all forms of soft and/or hard plastic used for any purpose whatsoever.
  - 7. SOLID WASTE - the term solid waste as used herein shall be deemed to include all garbage and rubbish that is collected for disposal and includes metal, scrap metal, white goods (appliances) and all non-recyclable waste streams.
  - 8. RECYCLABLE MATERIALS - the term designated recyclable materials as used herein shall be deemed to include all materials designated by municipality to be source separated from the solid waste stream for the purpose of recycling, and includes paperstock recyclable material, glass, plastic, aluminum and metal food cans.
  - 9. CO-MINGLED RECYCLABLE MATERIALS - the term co-mingled recyclable materials as used herein shall be deemed to include materials which are separated into separate containers consisting of the paperstock recyclable materials in one container and another container containing the other recyclable materials which includes glass,

aluminum and plastic.

10. DWELLING UNIT - the term dwelling unit as used herein shall be deemed to include any one-family, two-family or multi-family home; apartments, and high rises; condominiums and/or cooperatives.
11. PUBLIC OR PRIVATE INSTITUTIONS - Term public or private institutions as used herein shall be deemed to include all municipal and state government facilities; all religious, educational and healthcare facilities; any and all public and/or private civic organizations.
12. COMMERCIAL AND INDUSTRIAL ESTABLISHMENTS - the term commercial and industrial establishments as used herein shall be deemed to include all public or private establishments including, but not limited to, those manufacturing, retailing, and/or service establishments; food establishments in business for the purpose of consumption, on/or off premises, as well as food distribution and/or processing; and professional and/or corporate entities.
13. RECYCLING - the term recycling as used herein shall mean the process by which designated materials, which would otherwise become solid waste, are separated, collected, processed & returned to the economic mainstream in the form of raw materials or products.

## SECTION II: PURPOSE

Article 1. There is hereby established a mandatory program for the source separation of paperstock materials (newspapers, higrade paper, mixed paper and corrugated cardboard) and other recyclable materials (glass containers, aluminum cans, metal food cans and plastic) from the solid waste generated within the Town of Milford, for the purpose of recycling.

Article 2. All owners, lessees or occupants of dwelling units, except those physically disabled; and all owners, lessees and occupants, except those physically disabled; of business, commercial and/or industrial establishments; and all owners, lessees and occupants, except those physically disabled, of private, public and governmental institutions and facilities, shall separate paperstock materials and recyclable materials (glass containers, aluminum cans, metal food cans and plastic) from the solid waste and shall recycle these materials in the following manners:

### A. Paperstock Materials.

1. If possible, newspaper and paperstock materials shall be tied securely in bundles with twine, rope, cord or such other binding to facilitate handling and insure that it will not be windblown or distributed on the public streets. The bundles shall not exceed a weight of thirty (30) pounds each or a height of not more than twelve (12) inches each.
2. Paperstock Recyclable Material shall be placed in separate plastic bags.
3. These plastic bags shall be placed for collection on the day/days established, at the designated collection or pickup sites to be

determined by the Town of Milford or its authorized agent for collection in accordance with all applicable laws.

B. Other Recyclable Materials - Glass containers, Aluminum and Metal food cans and plastic .....

1. Glass containers used for the storage of food and/or beverages shall be rinsed clean of all residue and shall have all caps and/or rings removed.
2. Glass containers, aluminum beverage cans, metal food cans and plastic shall be placed in plastic bags having a capacity not to exceed thirty (30) gallons. No glass shall be deliberately broken for the purpose of filling any container or receptacle; however, accidentally broken glass will be accepted.
3. Plastic bags shall be placed for collection on the day/days to be established, at the designated collection or pickup site to be determined by the Town of Milford, or its authorized agent for collection, in accordance with all applicable regulations.

### SECTION III: COLLECTION BY AUTHORIZED PERSONS

Article 1. The Department of Public Works shall, upon receipt of a completed and approved application, issue permits to any person, business, civic or fraternal organization, authorizing the pickup or collection of certain specific recyclable materials for a specified purpose. Issuance of a permit shall not, however, authorize said person, business, civic or fraternal organization to pickup or collect said specific recyclable materials from any curbside, or from any designated municipal collection or pickup site in the Town of Milford.

### SECTION IV: COLLECTION OF UNAUTHORIZED PERSONS PROHIBITED

Article 1. Recyclable material as defined herein shall be the property of the Town of Milford once placed at the designated collection or pickup sites authorized by the municipality or its designated agent.

Article 2. It shall be a violation of the By-Law for any person unauthorized by the municipality or its designated agent to pick up or cause to be picked up, said recyclable materials as defined herein. Each such collection in violation hereof, shall constitute a separate and distinct offense, punishable as hereinafter provided for.

### SECTION V: COLLECTION

Article 1. On and after the adoption of this ordinance, Selectmen of Town of Milford shall establish the day(s) of collection or implementation requirements with waste and disposal businesses and private haulers regarding the collection or pickup sites designated for the collection of recyclable materials for the purpose of recycling.

### SECTION VI: VERIFICATION OF PRIVATE RECYCLING TONNAGE

Article 1. Any public or private institution and commercial establishment

actively participating in a recycling program within the Town of Milford and which is not authorized by the Town of Milford, or its authorized agent, shall submit biannual verification of the tonnage of materials recycled during the preceding six month period.

Article 2. The biannual-annual verification shall be submitted to the Selectmen no later than 30 days following the end of the first six month period following inception of this program and no later than 30 days after each successive six month period.

#### SECTION VII: ENFORCEMENT

Article 1. The Selectmen, at their discretion are hereby authorized to enforce this by-law and any amendments thereto.

#### SECTION VIII: PENALTY

Article 1. Any person, firm or corporation violating or failing to comply with any provisions of this by-law or any regulation promulgated pursuant thereto, may be guilty of a violation can be punished in accordance with RSA 31:39 III and any fines so collected shall inure to the Town of Milford to defray the costs of the recycling program. In addition, the Town may withhold collection services from repeat violators when in the judgment of the Selectmen it is necessary to implement this by-law.

#### SECTION IX:

Article 1. If any section, subsection, sentence, clause or phrase of this by-law is, for any reason, held to be unconstitutional or invalid, such section shall not affect the remaining portions of this by-law.

#### SECTION X:

Article 1. All by-laws or parts of by-laws inconsistent with this by-law are hereby repealed to the extent of such inconsistency.

#### SECTION XI:

Article 1. This by-law shall take effect immediately upon final , passage, approval and publication as required by Law.

Several residents questioned how clean their containers had to be. Selectman Leishman cleared the air stating that we need to dispose of jars and other containers without remnants present in order to exercise cleanliness and to be capable of controlling rodents. They do not expect us to wash the containers. S. Takacs asked if there is a state law making it mandatory to separate rubbish. Selectman Medlyn replied that it is not a state law, however there is legislation awaiting approval to mandate the separation.

Ernest Barrett wanted to know how this would affect the commercial dumper. Would he in fact have to separate his rubbish? Bob Courage replied that the commercial dumper has the option to separate the rubbish in

accordance with this regulation or to haul it himself to the landfill to dispose of it. He also added that the only reason for the increase in the DPW budget was due to the need of having to operate the landfill.

Steve Martin wanted to know why we weren't going to sell the recycled materials. Chairman Deasy explained we would have to do all the work and peddle it ourselves opposed to this program which it is already built into, and we're still saving a substantial amount of money. He also added the Board and Committee are aware there might be a number of workable difficulties this first year, but believe it will work.

**ARTICLE 34.** Motion by Chairman Ricciardi, seconded by Chairman Deasy and voted in the affirmative to see if the Town, in order to implement the provisions of RSA 149-M:13 (V), will vote to authorize the Selectmen, on behalf of the Town to enter into such written agreements with such private contracts as the Selectmen deem appropriate to discharge to solid waste disposal, as well as recycling of wastes and any other facets of solid waste disposal, or set terms and conditions as the Selectmen deem to be in the best interest of the Town, or take any other action relative thereto.

**ARTICLE 35.** It was amended by Philip Smith, seconded and voted in the affirmative to see if the Town will vote to discontinue and abandon, in a fashion pursuant to the authority granted by RSA 231:43, that portion of the western extension of Town Farm Road described below subject to the condition indicated below:

The portion of the western extension of Town Farm Road, currently a classified road, which is to be discontinued and abandoned shall be that portion of the westerly extension to Town Farm Road, approximately 350 feet in length, being shown as "Old Traveled Way" on a plan entitled "Road Relocation Plan, a portion of Stable Road, Milford, N.H. scale 1" = 50' dated December 7, 1988 prepared by Monadnock Survey, Inc., and more particularly described as follows:

Beginning at a point being North 77 degrees - 26' - 35" East - 167.06 feet from the northeast corner of the Smith residence; thence Westerly 350 feet, more or less, to a point being North 80 degrees - 10' - 38" West - 186.16 feet from the northeast corner of the Smith residence.

It being the understanding that this vote is completely contingent and conditional upon the receipt by the town within ninety (90) days of this vote of a good and sufficient Warranty Deed to those premises described as "Parcel A" as shown on said plan and it is the understanding that the purpose of this vote is to discontinue the aforementioned "Old Traveled Way" in return for the conveyance to the town of Town Farm Road as shown on the aforementioned plan, or take action relative thereto.

**ARTICLE 37.** This article was withdrawn by the Board of Selectmen which requested monies for improvements to be made at the War Memorial Park.

**ARTICLE 38.** This article was withdrawn by the Board of Selectmen which requested monies for two sets of bleachers to be used at Keyes Field.

**ARTICLE 39.** Motion by Chairman Ricciardi, seconded by Chairman Deasy

and unanimously voted in the affirmative for the Town to designate the following as scenic roads under the provisions of RSA 231:157...the purpose of protection and enhancing the scenic beauty of Milford:

Jennison Road: From its intersection with North River Road to the Mont Vernon Town Line.

Emerson Road: From its intersection with Federal Hill Road to its intersection with Ponemah Hill Road

Melendy Road: From its intersection with Osgood Road to its intersection with Route 13 South.

Ruonala Road: From its intersection with Melendy Road to its intersection with the Brookline Town Line.

Mile Slip Road aka Judd Hall Road: From its intersection with Mason Road to the Brookline Town Line.

Osgood Road: From its intersection with Young Road to the Brookline Town Line.

Or take any other action relative thereof. (By Petition)

ARTICLE 40. Motion by Petition, seconded by the Budget Committee and defeated to see if the Town will vote to establish a historic district commission in accordance with the provisions of RSA 672-677, or take any other action relative thereto. (By Petition)

ARTICLE 41. This article requested the Board of Selectmen to appoint seven (7) citizens as members of the Historic District Commission, was passed over due to the defeat of Article 40.

ARTICLE 43. Motion by Petition, seconded by the Budget Committee and unanimously defeated to raise and appropriate the sum of \$1,808 to provide a level of street lighting for the following streets:

Westchester Drive  
Boxwood Circle  
Acadia Lane  
Cypress Road  
Sycamore Road

Tamarack Court  
Georgetown Drive  
Wellesley Drive  
Larch Road  
Radcliffe Drive;

Said request is for a total of 24 lights on selected poles, seen as the minimum acceptable lighting in these areas as researched and documented by DPW. The monthly rental fee from PSNH is 9.40 pr light or 112.80 annually. The lighting would support 135 resident; is not requested for those locations of the above streets where housing is not presently occupied. Lights on these streets is essential for safety and deterrence of crime in the neighborhood. (By Petition)

Selectmen Medlyn was opposed to this article since 1988 had a lot of time spend on determining which streets needed this lighting and same was defeated. Medlyn did not feel these streets in question need this lighting.

ARTICLE 44. Motion made seconded and voted in the affirmative to amend 1.1 Definitions by deleting the definition of taxicab in its entirety and replacing it with the following:

#### TAXICAB ORDINANCE

##### 1.1 Definitions

"Taxicab" shall mean any rubber-tired motor vehicle having a mfg. rated capacity of not more than seven passengers; and in the call and demand of transportation of passengers. No vehicle over 7 years (prior wording was 5 years) old, dated from the date of manufacture shall be used as a taxicab. The Milford Police Dpt shall approve vehicles prior to issuance of license.

There being no further business to come before the 196th Town Meeting of Town Meeting of the Town of Milford, the meeting adjourned at 12:47 am.

A recount was called for the Office of School Board for three years by Paul Burkhardt. The recount for the office member was held on Wednesday, March 22, 1989 at the MASH High School Library at 3:10 p.m.

The counters for the recount were school board members Stephen Martin, Michael Richard, Stuart Horne, Marcia Anderson, Evelyn Higgs and Assistant School Moderator Charles Ferguson.

Observers were Ann Goodridge, Lorraine Prestipino, Marty Wilde, John Leslie, Mary Fletcher, Vicky Fletcher and Vesta Philbrick.

Candidates present were Paul Burkhardt and John Wilde. School Clerk Sandra Richard and Town Clerk Wilfred Leduc were also present.

The results are as follows following the recount:

Emma Wheeler	625
John Wilde	551
Richard Ball	522
Paul Burkhardt	522

TOWN MEETING 1990

T O W N   M E E T I N G

1990      WARRANT

To the inhabitants of the Town of Milford in the County of Hillsborough, in the State of New Hampshire, qualified to vote in Town Affairs:

You are hereby notified to meet at the Milford High School Gymnasium in said Milford on Tuesday, the thirteenth day of March, next, at twelve o'clock in the forenoon to act upon Article 1, Article 2, and other ballot votes, it being noted that the deliberative session of the Town Meeting is to commence at six thirty in the evening to act upon all other articles.

ARTICLE 1

To choose all necessary officers for the year ensuing.

ARTICLE 2

To see if the Town will vote to make the following changes in the Zoning Ordinance and Building Code of the Town of Milford.

BALLOT VOTE NO: 1

Are you in favor of the adoption of Amendment #1 as proposed by the Planning Board for the Town of Milford Zoning Ordinance:

To amend ARTICLE II - GENERAL PROVISIONS - SECTION 2.010 as follows:

2.010 Lots of record as indicated by a separately described tract in a deed recorded in the Hillsborough County Registry of Deeds or shown as a separate lot on a plan of land recorded in the Hillsborough County Registry of Deeds at the time of passage of this Ordinance (3/11/69) shall be considered to meet the minimum lot size and frontage requirements of this Ordinance, as long as the lot has a minimum of fifteen (15') feet of frontage on a principal route of access as defined in Article IV, DEFINITIONS, Para. 4.010.

/--\	/--\
\--/ YES	\--/ NO

BALLOT VOTE NO: 2

Are you in favor of the adoption of Amendment #2 as proposed by the Planning Board for the Town of Milford Zoning Ordinance as follows:

To amend Article IV, "Definitions" by adding the following:

COMMUNICATION TOWERS - Towers that are used to transmit cellular, radio, TV or other forms of communication.

/--\	/--\
\--/ YES	\--/ NO

BALLOT VOTE NO: 3

Are you in favor of the adoption of Amendment #3 as proposed by the Planning Board for the Town of Milford Zoning Ordinance to amend Article IV, "DEFINITIONS" by the addition of the following:

NURSERY -- The grounds and premises, private or public, on or in which nursery stock is propagated, grown or cultivated for the purpose of distributing or selling nursery stock as a business. This shall include the on-site retail distribution of nursery stock provided, however, under this definition it is not intended that such retail distribution will be in the form of a retail store or be the principal use of the premises.

NURSERY STOCK -- All hardy deciduous and evergreen trees and shrubs, brambles, woody vines, woody florist stock and herbaceous annuals and perennials, their roots, cuttings, grafts, scions, buds, seeds and plant parts thereof, including any collected plants, for and capable of propagation.

/--\  
\--/ YES

/--\  
\--/ NO

**BALLOT VOTE NO: 4**

Are you in favor of the adoption of Amendment #4 as proposed by the Planning Board for the Town of Milford Zoning Ordinance as follows:

To amend Article V, Residence "A" District, Para. 5.023 "Uses specifically excluded" by adding the following:

D. Communication Towers

/--\  
\--/ YES

/--\  
\--/ NO

**BALLOT VOTE NO: 7**

Are you in favor of the adoption of Amendment #7 as proposed by the Planning Board for the Town of Milford Zoning Ordinance as follows:

To amend Article V, Residence "R" District, Para. 5.042 "Acceptable Uses by Special Exception" by adding the following:

B. Communication Towers - The Board of Adjustment may place such limitations on height as the Board feels is necessary for the proposal to conform to the Special Exception standards.

/--\	/--\
\--/ YES	\--/ NO

**BALLOT VOTE NO: 8**

Are you in favor of the adoption of Amendment #8 as proposed by the Planning Board for the Town of Milford Zoning Ordinance as follows:

To amend Article V, Commercial/Business District, Para. 5.052 "Uses Specifically Excluded" by adding the following:

C. Communication Towers

/--\	/--\
\--/ YES	\--/ NO

**BALLOT VOTE NO: 9**

Are you in favor of the adoption of Amendment #9 as proposed by the Planning Board for the Town of Milford Zoning Ordinance as follows:

To amend Article V, Limited Commercial District, Para. 5.072 "Uses Specifically Excluded" by adding the following:

G. Communication Towers

/--\	/--\
\--/ YES	\--/ NO

**BALLOT VOTE NO: 10**

Are you in favor of the adoption of Amendment #10 as proposed by the Planning Board for the Town of Milford Zoning Ordinance as follows:

To amend Article VI - 6.020 - WETLAND CONSERVATION DISTRICT  
Para. 6.021 - GENERAL as follows:

**6.021 GENERAL**

A. The Wetland Conservation District is hereby determined to be those areas defined and delineated as follows:

1. Swamps, marshes and bogs as defined by the New Hampshire State Wetlands Board, New Hampshire Code of Administrative Rules, Chapter Wt 100 through Wt 800, Appendix A, 1987.
2. All areas of poorly drained and very poorly drained soils as determined by the United States Soil Conservation Service Survey maps completed in 1972 for the Town of Milford, New Hampshire and/or areas where a site specific survey performed by a registered soil scientist locates poorly and very poorly drained

soils not identified in the Soils Conservation Service published soil survey. For a detailed explanation of soil types, see "Soil Survey of Hillsborough County, New Hampshire, Eastern Part, October, 1981" and on file in the offices of the Town Clerk and Planning Board.

3. Areas that are saturated by surface or ground water sufficient to support a prevalence of hydrophytic vegetation typically adapted for life in saturated soil conditions. Hydrophytic plant species are listed in the United States Fish and Wildlife Service National List of Plant Species That Occur in Wetlands: New Hampshire, 1988, or shown on the United States Fish and Wildlife Service National Wetland Inventory Map for the Milford Quadrangle.
4. The Wetland Buffer Zone (See Section 6.023)
5. For the purpose of this ordinance, a wetland will be defined as those areas described in A1, A2 and A3 as stated above.

B. The Wetland Conservation District shall be considered as overlaying any other Districts established by this Ordinance. Any use permitted in the portions of the Districts so overlayed shall only be permitted subject to all provisions of this Section.

/--\  
 \--/ YES

/--\  
 \--/ NO

#### BALLOT VOTE NO: 11

Are you in favor of the adoption of Amendment #11 as proposed by the Planning Board for the Town of Milford Zoning Ordinance as follows:

To amend Article VI - 6.020 WETLAND CONSERVATION DISTRICT, Para. 6.022 PURPOSE as follows:

#### 6.022 PURPOSE

A. The purpose of the Wetland Conservation District is to protect the public health, safety, general welfare and property. It is further intended:

1. To be a guide in the use of wetlands in the Town of Milford.
2. To protect persons and property from flood damage by preserving the natural floodwater storage areas.
3. To control the development of structures and land uses which contribute to the pollution of surface and ground water by sewerage, hazardous substances or siltation.
4. To protect unique and unusual natural areas and wildlife habitats and maintain ecological balance.
5. To protect aquifers, which serve as existing or potential water supplies, as well as the aquifer recharge system.
6. To prevent unnecessary or excessive expenses to the Town to provide and maintain essential services and utilities which arise because of the inharmonious use of wetlands.
7. To encourage those uses that can be appropriately and safely located in wetland areas.

/--\  
 \--/ YES

/--\  
 \--/ NO

BALLOT VOTE NO: 12

Are you in favor of the adoption of Amendment #12 as proposed by the Planning Board for the Town of Milford Zoning Ordinance as follows:

To amend Article VI - 6.020 WETLAND CONSERVATION DISTRICT, Para. 6.023 LOCATION AND SCOPE OF AUTHORITY as follows:

6.023 LOCATION AND SCOPE OF AUTHORITY

A. No construction or ground disturbance shall occur within twenty-five (25') feet or greater of wetlands as defined in Section 6.021 A1, A2 and A3 based on the recommendation of the United States Department of Agriculture Soil Conservation Service. This twenty-five (25') foot buffer zone shall be parallel to and surveyed from the edge of wetland on a horizontal plane. Except for the provision stated below in 6.023B.

B. No construction or ground disturbance shall occur within fifty (50') feet or greater of the ponds and water courses listed in this section below, based on the recommendation of the United States Department of Agriculture Soil Conservation Service. This fifty (50') foot buffer zone shall be parallel to and surveyed from the recognized edge of ponds and water courses listed below on a horizontal plane.

1. SOUHEGAN RIVER from the Wilton/Milford town line to the Milford/Amherst town line.
2. GREAT BROOK from its commencement at Judd Hall Road, (aka Mile Slip Road) 1,500 feet south of Mason Road, to Railroad Pond, and from Railroad Pond to the Souhegan River.
3. TUCKER BROOK from its entrance into Milford in the vicinity of the granite bound on the Milford/Wilton town line on the east, to its junction with the Souhegan River.
4. BIRCH BROOK from its commencement at the wetland lying between Whitten Road and Chappell Drive to its junction with Great Brook.
5. PURGATORY BROOK from its entrance into Milford at the Milford/Lyndeborough town line in the north, to its junction with the Souhegan River.
6. COMPRESSOR BROOK from its beginnings as follows:
  - a. Compressor Brook, East Branch, from its entry into Milford at the Milford/Brookline Town line in the south east portion of Milford to its junction with Compressor Brook south of Melendy Road and east of Ruonala Road.
  - b. Compressor Brook, West Branch, from its beginning at a wetland on the west side of Ball Hill Road to its junction with Compressor Brook as described in a. above
  - c. Compressor Brook, from its junction with the East Branch and the West Branch south of Melendy Road and east of Ruonala Road to its junction with Great Brook.
7. HARTSHORN BROOK from the Mont Vernon/Milford town line, through Hartshorn Pond to its junction with the Souhegan River.
8. OX BROOK from its beginning in a wetland west of Melendy Road to its junction with Compressor Brook.
9. OSGOOD POND
10. RAILROAD POND
11. HARTSHORN POND
12. COMPRESSOR POND

13. MITCHELL BROOK from its entrance at the Milford/Mason Town line to its junction with Spaulding Brook.
14. SPAULDING BROOK from its entrance at the Milford/Mason Town line to its exit at the Milford/Brookline Town line.

All of the above descriptions have been marked on and taken from the U.S.G.S, Milford Quadrangle, Hillsborough County, New Hampshire, Photo revised 1985 map. A copy of which will be on file in the Offices of the Town Clerk and Planning Board.

NOTE: If the water courses listed above enter a wetland area, or wetlands are adjacent to a pond then, the fifty (50') feet shall be measured from the recognized edge of the water course and or pond.

C. The purpose of the buffer zone is to reduce sedimentation of wetlands and bodies of water, to aid in the control of nonpoint source pollution and to provide a vegetative cover for filtration of runoff.

### ARTICLE 3

To see if the Town will vote to authorize the Board of Selectmen to enter into a lease purchase agreement for the purchase of a \$ 350,000 ladder truck for the Milford Fire Department, said lease purchase agreement to be for a five year period and include a buy out provision at the end of the lease of \$ 1.00 and said lease purchase agreement to be not more than an annual payment of \$ 81,139, or take any other action relative thereto. (By request of the Board of Firewards)

### ARTICLE 4

To see if the Town will vote to raise and appropriate the sum of \$ 75,000 to be paid into the Capital Reserve Fund authorized for the purpose of financing the acquisition of fire trucks and equipping thereof, or take any other action relative thereto. (By request of the Board of Firewards) (Withdrawn if 3 above passes)

### ARTICLE 5

To see if the Town will vote to raise and appropriate the sum of \$ 10,000 to purchase, modify and install components of a replacement and upgraded heating for the Milford Fire Station, or take any other action relative thereto. (By request of the Board of Firewards)

### ARTICLE 6

To see if the Town will vote to raise and appropriate the sum of \$ 11,000 for the purchase of " Bunker Type " protective full length fire pants, National Fire Protection Agency certified, for the Milford Volunteer Fire Department, or take any other action relative thereto. (By request of the Board of Firewards)

### ARTICLE 7

To see if the Town will vote to adopt the provisions of RSA 72:28, V and VI for an optional veterans exemption and an expanded qualifying war service for veterans seeking the exemption? The optional veterans exemption is \$ 100, rather than \$ 50. (By Petition) (Vote by Ballot)

### ARTICLE 8

To see if the Town will vote to adopt the provisions of RSA 72:35, IV for an optional property tax exemption on residential property for a service connected total disability? The optional disability exemption is \$ 1,400, rather than \$ 700. (By Petition) (Vote by Ballot)

### ARTICLE 9

Shall we adopt the provisions of RSA 287-E relative to the conduct of games of bingo. (Vote by Ballot)

## ARTICLE 10

Shall we adopt optional adjusted elderly exemptions from property tax? The optional exemptions, based on assessed value, for qualified taxpayers shall be as follows: for a person 65 years of age up to 75 years, \$ 20,000 ; for a person 75 years of age up to 80 years, \$ 30,000; for a person 80 years of age or older, \$ 40,000. To qualify, the person must have been a New Hampshire resident for at least 5 years; own the real estate individually or jointly, or if the real estate is owned by his spouse, they must have been married for at least 5 years. In addition, the taxpayer must have a net income of less than \$ 10,000 or, if married, a combined net income of less than \$ 12,000; and own net assets not in excess of \$ 30,000 excluding the value of the persons residence. (NH RSA 72:43-h) (Petition Article) (Vote by Ballot)

## ARTICLE 11

To see if the Town will vote to raise and appropriate the sum of \$ 14,500 for the purchase of a new and appropriately equipped police cruiser, or take any other action relative thereto.

## ARTICLE 12

To see if the Town will vote to raise and appropriate the sum of \$ 18,000 for hiring additional administrative staff for the Police Department in order to keep open the Milford Police Station from 4:30 PM through 11:00 PM Monday through Saturday. Said funds are for salary, uniform and fringe benefit costs and upon approval of this article said cost allocation is to be transferred to the general operating budget, or take any other action relative thereto.

## ARTICLE 13

To see if the Town will vote to raise and appropriate the sum of \$ 1,950 for the purpose of providing Hepatitis-B shots to members of the Police and Fire Departments.

## ARTICLE 14

To see if the Town will vote to raise and appropriate the sum of \$ 9,000 for the purpose of updating the Town's Master Plan, said plan having been adopted in 1985 ; said update to consist of the following tasks; updating data, maps, public survey and rewriting town-wide goals, objectives and recommendations, or take any other action relative thereto. (By request of the Planning Board)

## ARTICLE 15

To see if the Town will vote to establish the following tract of land pursuant to the provisions of RSA 31:110 by designating and transferring the following town owned land as town forest: Harlan Burns land, Map 10 Lot 58, same abutting the existing town forest lands collectively known as Tucker Brook Town Forest, or take any other action relative thereto. (By request of the Conservation Commission)

#### ARTICLE 16

To see if the Town will vote to establish as town forest land, pursuant to the provisions of RSA 31:110 by designating and transferring the following town owned conservation lands as town forest: Edgar Norwood land, Map 9 Lot 5, Helen Rotch Ferguson land, Map 8 Lot 85, and William B. Rotch land, Map 8 Lots 91 and 92, the above comprising the Mayflower Conservation Land, or take any other action relative thereto. (By request of the Conservation Commission)

#### ARTICLE 17

To see if the Town will vote to deposit one hundred ( 100 ) percent of the revenues collected, in 1990, pursuant to RSA 79-A ( Current Land Use Penalty ) in the Conservation Land Fund, in accordance with RSA 36-A: 5 III as authorized by RSA 79-A: 25 II, or take any other action relative thereto. (By request of the Conservation Commission).

#### ARTICLE 18

To see if the Town will vote to raise and appropriate the sum of \$ 50,000 to be added to the fund created in accordance with RSA 36-5, said fund together with any future additions to the same to be allowed to accumulate from year to year and be available for the acquisition of property for conservation purposes as the Town may direct in accordance with the provisions of RSA 36-a, or take any other action relative thereto. (By request of the Conservation Commission) (Withdraw if 16 above passes)

#### ARTICLE 19

To see if the Town will vote to raise and appropriate the sum of \$ 3,925 to perform a survey of a tract of town owned land of approximately six acres located between two channels of the Souhegan River in the general vicinity of the Milford Drive-In Theater, and which abuts the state owned Milford Fish Hatchery, or take any other action relative thereto. (By request of the Milford Conservation Commission)

#### ARTICLE 20

To see if the Town will vote to designate and proclaim 22 April 1990, as Earth Day 1990, and to set aside that day for public activities promoting preservation of the global environment and launching the "Decade of the Environment." (By request of the Conservation Commission)

#### ARTICLE 21

To see if the Town will vote to raise and appropriate the sum of \$ 16,870 to purchase a new 1990 one ton dump truck, or take any other action relative thereto.

#### ARTICLE 22

To see if the Town will vote to raise and appropriate the sum of \$ 25,000 to add to the established Highway Capital Reserve Fund for the construction and/or reconstruction of Class IV and Class V Highways, or

take any other action relative thereto.

#### ARTICLE 23

To see if the Town will vote to raise and appropriate the sum of \$ 3,000, this to be matched with a \$ 1,500 contribution from the Milford Rotary Club to purchase additional bleachers for Keyes Field, or take any other action relative thereto. (By request of the Parks and Playgrounds Advisory Committee)

#### ARTICLE 24

To see if the Town will vote to raise and appropriate the sum of \$ 750 to provide landscaping and plantings in the War Memorial Park, or take any other action relative thereto. (By request of the Parks and Playgrounds Advisory Committee)

#### ARTICLE 25

To see if the Town will vote to adopt the provisions of RSA 41:9-a which will allow the Board of Selectmen to establish or amend fees for the following purposes;

(a) The issuance of any license or permit which is part of a regulatory program which has been established by vote of the town.

(b) The use or occupancy of any public revenue-producing facility, as defined in RSA 33-B:1, VI, the establishment of which has been authorized by vote of the Town, or take any other action relative thereto.

#### ARTICLE 26

To see if the Town will vote to authorize the Selectmen to borrow money in anticipation of taxes of the current fiscal year and to issue notes therefore in accordance with RSA 33:7.

#### ARTICLE 27

To see if the Town will vote to raise and appropriate the sum of \$ 579,946 to operate and maintain the Water Department, said appropriation to be offset by income from the Water Users of an equal amount, or take any other action relative thereto.

#### ARTICLE 28

To see if the Town will vote to raise and appropriate the sum of \$ 957,569 to operate and maintain the Wastewater Treatment Plan and Sanitary Sewer Collection System, said appropriation to be offset by income received from a sewer users charge, or take any other action relative thereto.

#### ARTICLE 29

To see if the Town will vote to raise and appropriate the sum of \$ 10,000 to be paid into the trust fund authorized for the 200th

birthday celebration of Milford in the year 1994, said funds to accumulate from year to year until the Bicentennial and for the payment of cost such as parade, pageants, commemorative coins, musicians, entertainment, prizes, fireworks and other allied programs developed by the Bicentennial Committee, or take any other action relative thereto.

#### ARTICLE 30

To see if the Town will vote to raise and appropriate the sum of \$ 10,500 for support of the Town of Milford's first annual Family Fourth of July Festivities, or take any other action relative thereto. (By request of the Milford Fourth Committee)

#### ARTICLE 31

To see if the Town will vote to raise and appropriate the sum of \$ 12,000 to be paid into the established Capital Reserve Fund authorized for the purpose of financing the acquisition of ambulances and the equipping thereof, or take any other action relative thereto. (By request of the Ambulance Directors)

#### ARTICLE 32

To see if the Town will vote to raise and appropriate the sum of \$ 60,000 for the purpose of buying New Hampshire Retirement System prior year employee and employer credits of present and former town employees as identified in the recently authorized actuarial analysis, who were not enrolled into the mandatory retirement system at the proper time by the Town, such purchase of prior year credit in order to establish the employees proper longevity and as appropriate, vesting rights, or take any other action relative thereto.

#### ARTICLE 33

To see if the Town will vote to establish a capital reserve account in accordance with the provisions of New Hampshire Revised Statutes Annotated Chapter 35, for the purpose of providing funds to defray the cost of remapping the town in accordance with National Map Accuracy Standards, and to raise and appropriate the sum of \$ 5,000 to pay into said fund to be withdrawn by further action of the Town when remapping is authorized, or take any other action relative thereto. (last mapping 1968)

#### ARTICLE 34

To see if the Town will vote to authorize the Board of Selectmen to expend \$ 15,000 from the Water Impact Assessment Fund, to cover costs associated with the survey, design, preparing plans, specifications, bidding documents, and easements for the installation of a new 12 inch water main on Nashua Street between Clinton and Pine Streets and; the installation of a new 12 inch water main, beginning on Shepard Street, extending westerly along the sanitary sewer interceptor easement, thence northerly crossing the Souhegan River and connecting to the existing 12 inch water main on Souhegan Street, or take any other action relative thereto.

## ARTICLE 35

To see if the Town will vote to amend the following ordinance, said ordinance having been adopted at the March 1986 Town Meeting:

### " ORDINANCE WITH RESPECT TO THE REGULATION AND OPERATION OF TAXICABS WITHIN THE TOWN OF MILFORD "

All references, responsibilities and administration of the Town Clerk are rescinded and reassigned to the Milford Police Department.

## ARTICLE 36

To see if the Town will vote to amend the following ordinance, said ordinance having been adopted at the August 1987 Special Town Meeting:

### " ORDINANCE REGULATING ALARM SYSTEMS "

#### Section 10 False Alarms: Prevention and Cost Payment

- (2) a. The alarm user of any alarm system shall be assessed a service charge of one hundred ( \$ 100.00 ) dollars for each false fire alarm transmitted by such system after three ( 3 ) false alarms in a calender year, where such false alarms result in a response by the fire department.
- b. The alarm user of any alarm system shall be assessed a service charge of twenty five ( \$ 25.00 ) dollars for each false burglary alarm transmitted by such system after three ( 3 ) false alarms in a calender year, where such false alarms result in a response by the police department.
- c. Failure to pay such false alarm service charge in thirty ( 30 ) calender days shall subject such alarm user to suspension of their alarm user permit by the Chief of Police or Fire Chief.
- d. An alarm user may appeal false alarm service charges in writing to the Board of Selectmen within ten ( 10 ) days after receipt of the notice of penalty.

## ARTICLE 37

To see if the Town will vote to discontinue and abandon, in a fashion pursuant to the authority granted by RSA 231: 43, that portion of Pine Street described below:

All that tract or parcel of land situated in Milford that now or at anytime heretofore was identified as "Pine Street" to the extent that the same connected Bridge Street on the north with the North line of a tract of land now shown on Town of Milford Tax Maps as Lot 99-1, Map 26. or take any other action relative thereto.

#### ARTICLE 38

To see if the Town will vote to raise and appropriate the sum of \$ 1,000 for the purpose of joining other area towns (Amherst, Wilton, New Ipswich, Lyndeborough, Greenville, and others) in support of a Regional Family Health Inc. facility to be located in Milford, or take any other action relative thereto. (By request of the Welfare Department)

#### ARTICLE 39

To see if the Town will vote to authorize the Selectmen to apply for and accept Federal, State, local or private funds for the purposes of funding a Day Care program in Milford, said funds to be passed through/contracted with an established health care service providing agency in Milford, or take any other action relative thereto. (By request of the Welfare Department)

#### ARTICLE 40

Resolved: that with a view to introducing competition and better quality at a lower price in every department of the town, including town administration, public works, parks and recreation, communications, etc., but excluding police, fire, and elected officials, the selectmen conduct an initial test at privatisation in the operation and administration of two departments, 1. the water department and 2. the sewer department: that these two departments be put out for 2 year contracts to private bids, contracts to be revocable at any time the selectmen determine to be sufficient for reasons of inadequate performance, this act to go into effect immediately after the town meeting, March 1990. (Article by petition)

#### ARTICLE 41

Resolved: that Milford protest the enormous increases in the cost of Hillsborough County spending placed upon the Milford taxpayers, and that insofar as it is constitutionally possible Milford taxpayers reduce their payment to the county about 20% or \$ 209,663 less, that is from about \$ 1,048,317 to a total amount of \$ 838,654, bearing in mind that the county government raised its charges to Milford outrageously and unnecessarily in the past year. These numbers are based upon the NH Dept of Rev. Admin. figures of \$ 1.49 on \$ 1,000 dollars of assessed valuation of \$ 703,568,000 total net assessed valuation for Milford, but may be altered to reflect true conditions. (Article by Petition)

#### ARTICLE 42

Resolved: A 20% TAX-CUT for all Milford Taxpayers, by way of a "GRAMM-RUDMAN SPENDING LAW FOR MILFORD" - - that the bottom line of the town budget (budget impact section aside from bonds etc.,) for 1990-1991 be reduced 20% or \$ 1,111,537 below the bottom line of the current town budget (impact figure) for the next year of about \$ 5,557,687 or set at \$ 4,576,389 which excludes bonds and other so-called fixed costs and increases which "cannot be altered." This 20 % reduction will be a net reduction, that is a reduction including bond service costs, so that some departments will be cut more than 20 % but the taxpayers' town portion of taxes will be reduced a full 20 %. This means that the 20% reduction will be reflected in a 20 %

REDUCTION IN EVERY TAXPAYERS BILL IN THE COMING YEAR, provided that the voters also pass the 20 % reduction in school and county taxes. One provision of this article is to be that no town department personnel, but the selectmen in combination with the town budget committee will determine where the "across-the-board" cuts are to be made, so that Milford avoids the problem in which services are cut and administrative salaries remain untouched. ( Article by petition )

#### ARTICLE 43

To see if the Town will vote to raise and appropriate a sum of money to fund the cost items related to an increase in Police Department salaries, and benefits attributable to the Collective Bargaining Agreement being entered into by the Milford Board of Selectmen and Local 1801 of the Federation of State, County and Municipal Employees for the 1990 - 1991 fiscal year only, each subsequent year to be subject to approval by the Town voters, or take any other action relative thereto. Such sum of money represents the additional costs attributable to an increase for the 1990 - 1991 fiscal year only in salaries and benefits over those obligations payable under the prior Collective Bargaining Agreement..

(This article will be acted upon only if a Collective Bargaining Agreement has been achieved and the sum of money needed to fund such cost items is, therefore, known before the Annual Town Meeting. An affirmative vote on this article will cause these funds to be transferred to the general operating budget, salary line items of the Police Department.)

#### ARTICLE 44

To see what action the Town wishes to take with respect to a Fact Finder's report and recommendation relating to cost items for Police Department salaries and other benefits for the fiscal year 1990-1991 only and to see what sum of money the Town will raise and appropriate to fund such cost items, each subsequent fiscal year to be subject to approval and funding by the Town voters. Such sum of money represents the additional costs attributable to the increases for the 1990 - 1991 fiscal year only in salaries and benefits over those obligations payable under the prior Collective Bargaining Agreement between the Milford Board of Selectmen and Local 1801 of the American Federation of State, County and Municipal Employees pursuant to N.H. Revised Statutes Annotated, Chapter 273-A.

(This Article will be acted upon only if a Fact Finder's report has been received and can be acted upon by the Milford Board of Selectmen and Local 1801 of the American Federation of State, County and Municipal Employees prior to the Annual Town Meeting. An affirmative vote on this article will cause these funds to be transferred to the general operating budget, salary line items of the Police Department.)

#### ARTICLE 45

To see if the town will vote to raise and appropriate the sum of \$ 25,000; \$ 15,000 from water department revenues and the balance from taxation, in order to determine the future of the Milford Water Department in terms of expansion within the hydraulic limits of the existing system and also beyond these limits. As the towns concerns are how can we accom-

plish the expansion technologically and how can we afford the expansion we shall undertake the following tasks; 1) Develop a plan and the cost of expansion beyond the present system, 2) Develop a plan and costs for expanding beyond 390 foot elevation, 3) Determine water department operating costs for ten years, 4) Determine the effects of a water district, 5) Determine selling price of the Milford Water Department, 6) Other tasks as appropriate, or take any other action relative thereto. (By request of the Long Range Water Planning Committee)

#### ARTICLE 46

To seem if the Town will vote to authorize the Board of Selectmen to execute and enter into, on behalf of the Town of Milford, a Waste Supply Agreement with Wheelabrator Epping Inc., for the receipt and disposal of waste of the Town of Milford, which has been conditionally approved by the Board of Selectmen pending ratification by the Town Meeting, or take any other action relative thereto.

#### ARTICLE 47

To see if the town will vote to raise and appropriate such monies as may be necessary to defray town charges for the period 1 January, 1990 to 31 December, 1990, or take any other action relative thereto.

#### ARTICLE 48

To see if the Town will vote to adopt the following ordinance with respect dwelling standards in the town of Milford:

##### SECTION 1 TITLE:

This ordinance shall be known as the "Town of Milford Dwelling Standards Ordinance".

##### SECTION 2. AUTHORITY AND PURPOSE:

This Ordinance is adopted under the authority of and pursuant to NH RSA 48-A:2 for the purpose of regulating and causing the repair, alteration, improvement, closing, vacating, demolition, or removal of dwellings or portions thereof, unfit for human habitation due to dilapidation; dangerous defects which are likely to result in fire, accidents, or other calamities; unhealthful lack of ventilation or sanitary facilities; or due to other unhealthy or hazardous or dilapidated conditions, which have an adverse effect on the public health, safety, and welfare.

##### SECTION 3 MOST STRINGENT PROVISIONS TO APPLY.

The provisions of this Ordinance shall apply in all cases concerning human habitation standards for dwellings, except that in the case of a conflict between the provisions of this Ordinance and the provisions of any other statute, ordinance, by-law, code, rule or regulation, the provision which imposes the higher or most restrictive standard shall govern.

#### SECTION 4 DEFINITIONS:

For the purposes of this Ordinance, the following words and phrases shall have the meanings respectively described to them by this section, unless a different meaning clearly appears from the context.

All words used in the present tense include all other tenses and the singular number includes the plural and the plural the singular.

-1 "Municipality" shall mean the Town of Milford, a municipal corporation, of Hillsborough County, State of NH.

-2 "Governing Body" shall mean the town meeting.

-3 "Dwelling or House" shall mean any building, structure, trailer, mobile-home, manufactured house, or camp, or part thereof for human habitation or intended to be so used and includes any appurtenances belonging thereto or usually enjoyed therewith and the property on which the dwelling or house is located. A building, structure, trailer, mobile-home, manufactured house or camp, or part thereof, shall be considered a dwelling for the purposes of this Ordinance even though unoccupied and even though the owner does not intend use thereof as a dwelling.

-4 "Public Agency" shall mean the Milford Building Inspector, the Milford Fire Chief, and the Milford Health Officer, acting individually or jointly, who are hereby authorized by this Ordinance to exercise the powers and perform the duties conferred upon them by this Ordinance.

-5 "Unfit for Human Habitation" shall mean that conditions exist in a dwelling which are unusually, abnormally, or unreasonably dangerous or injurious to the health or safety of the occupants of such dwelling, the occupants of neighboring dwellings, other residents of the municipality, or all three. Conditions may include, but are not limited to defects which increase beyond normal the hazards of fire, accident, or other calamities; lack of reasonable adequate ventilation, light or sanitary facilities; dilapidation; disrepair; dangerous structural defects; uncleanness; over-crowding with persons, animals, things, or all three; inadequate ingress or egress; inadequate drainage; unreasonable storage of junk, as that term is defined in NH RSA 236:91 and 236:112; or any violation of other health, fire, building or safety regulations, or amendments thereto, in effect in the Town of Milford, or violations of Section 5 of this Ordinance.

#### SECTION 5 MINIMUM STANDARDS FOR USE OR OCCUPANCY OF A DWELLING:

a. All dwellings in the municipality shall comply at a minimum with the below listed ordinances, by-laws, codes, rules, and regulations, and shall also comply with any amendments to such ordinances, by-laws, codes, rules and regulations and any additional ordinances, by-laws, codes, rules, and regulations concerning and regulating dwellings, which the municipality may adopt from time to time, or which may be in effect at the time of adoption of this Ordinance, and any amendments thereto:

- (1) The Town of Milford, NH, Zoning Ordinance;
- (2) Building Officials & Code Administrators International, Inc. The BOCA Basic National Building Code/1984;
- (3) The Town of Milford, NH Building Code;
- (4) Building Officials & Code Administrators International, Inc, Basic Fire Prevention Code/1981;
- (5) National Fire Protection Association 30, Flammable and Combustible Liquids Code/1984; and
- (6) The Town of Milford Health Regulations.

b. No landlord, as defined by NH RSA 540-A:1, I shall rent or lease a dwelling in the municipality, which is maintained in a condition such that:

- (1) The premises are infested by insects and rodents where the landlord is not conducting a periodic inspection and eradication program;
- (2) There is defective internal plumbing or a backup of sewage caused by faulty septic or sewage system;
- (3) There are exposed wires, improper connectors, defective switches or outlets or other conditions which create a danger of electrical shock or fire;
- (4) The roof or walls leak consistently;
- (5) The plaster is falling or has fallen from the walls or ceilings;
- (6) The floors, walls or ceilings contain substantial holes that seriously reduce their function or render them dangerous to the inhabitants;
- (7) The porches, stairs or railings are not structurally sound;
- (8) There is an accumulation of garbage or rubbish in common areas resulting from the failure of the landlord to remove or provide a sufficient number of receptacles for storage prior to removal unless the tenant has agreed to be responsible for removal under the rental agreement and the landlord has removed all garbage at the beginning of the tenancy;
- (9) There is an inadequate supply of water or whatever equipment that is available to heat water is not properly operating;
- (10) There are leaks in any gas lines or leaks or defective pilot lights in any appliances furnished by the landlord; or

(11) The premises do not have heating facilities that are properly installed, safely maintained and in good working condition, or are not capable of safely and adequately heating all habitable rooms, bathrooms and toilet rooms located therein, to a temperature of at least an average of 65 degrees F.; or, when the landlord supplies heat in consideration for the rent, the premises are not actually maintained at a minimum average room temperature of 65 degrees F. in all habitable rooms.

#### SECTION 6 PETITION:

The public agency shall enforce this Ordinance whenever it appears to the public agency by inspection that a dwelling is unfit for human habitation, or upon petition filed with the public agency by at least ten residents of the municipality charging that a dwelling is unfit for human habitation.

#### SECTION 7 PRELIMINARY INSPECTION:

An enforcement action shall be commenced by a preliminary investigation by the public agency of a dwelling named in any petition or appearing by the public agency to be unfit for human habitation. A search warrant shall be unnecessary if there are apparent violations of this Ordinance based on an exterior visual inspection of the dwelling. However, upon denial or resistance of the owner or persons in possession to permit inspection of a dwelling, the public agency shall seek a search warrant from any municipal, district, or Superior Court authorized to issue a search warrant, if an inspection of said dwelling is required to carry out the provisions of this Ordinance.

#### SECTION 8 COMPLAINT:

After such preliminary inspection, the public agency, if it determines a basis for finding that the dwelling is unfit for human habitation, shall issue and cause to be served upon the owner, every mortgagee of record, persons in possession, and all parties in interest, a complaint which states that there is a basis for finding that the dwelling is unfit for human habitation and stating such basis therefor. Such complaint shall also give notice that a public hearing will be held before the public agency at a place, date, and time therein fixed. The date of the hearing shall not be less than 10 days nor more than 30 days after the serving of the complaint. The notice shall also provide that the owner, mortgagee, persons in possession, and all parties in interest may file an answer to the complaint prior to the hearing and appear in person, or through an agent at the hearing to give testimony concerning the fitness of the dwelling for human habitation and concerning the issue of whether the repair, alteration or improvement requested can be made at a reasonable cost in relation to the dwelling's value, and whether the owner has the ability to assume such costs.

#### SECTION 9 SERVICE OF COMPLAINT:

The complaint shall be served on all parties, as set forth under Section 8 of this Ordinance by a sheriff, deputy sheriff, constable, or police officer, authorized to serve and return writs and other precepts.

If the person to be served resides outside the state, service may be made upon such person by registered mail. If there are any unascertained persons having an interest in said dwelling, notice of the complaint may be given them by publication in a newspaper having general circulation in the municipality, with such publication taking place at least ten days before the date set for the hearing.

#### SECTION 10 HEARING:

The hearing shall be conducted in compliance with NH RSA 91-A. The public agency may administer affirmations, examine witnesses and receive evidence. The rules of evidence prevailing in courts of law or equity shall not be controlling in hearings before the public agency.

#### SECTION 11 ORDER:

If, after notice and hearing, the public agency determines that the dwelling under consideration is unfit for human habitation, according to the standards of this Ordinance, it shall issue and cause to be served upon the owner an Order, in writing, which sets forth the decision and the findings of fact which support such decision. The public agency shall also take testimony on and make a determination as to whether the repair, alteration or improvement to the dwelling can be made at a reasonable cost in relation to its value, and whether the owner has the ability to assume such costs, and shall set forth such determinations in the Order.

In addition, the Order shall state one of the following three (3) alternatives:

1. That the owner shall make repairs, alterations, and improvements as specified within the Order, and within the time period specified in the Order, so as to render the dwelling fit for human habitation; or
2. That the owner shall see that the dwelling is vacated and closed as a human habitation, by a date specified in the Order, until, such time as the owner shall make repairs, alterations, and improvements specified in the Order, so as to render the dwelling fit for human habitation; or
3. That the owner shall remove or demolish the dwelling by the date specified in the Order.

The public agency shall not require alternatives 1 and 2, if there is a determination that the cost to repair or improve is not reasonable in comparison to the dwelling value and the owner is unable to assume the cost of such repair, alteration or improvement.

The Order shall be mailed to the owner by certified mail, return receipt requested.

#### SECTION 12 APPEAL OF ORDER:

Any owner aggrieved by the public agency's Order shall have the right to file an appeal of the Order with the Board of Selectmen.

Such appeal shall be filed within 20 days from the date of mailing of the Order, by filing an appeal with the office of the Board of Selectmen, and stating within such appeal a request for relief and the reasons therefor. If no appeal is filed within said 20 days, the Order of the public agency shall apply, and no further appeal shall be permitted.

The Board of Selectmen shall hold a public hearing on such appeal after first giving due notice of the date, time, and place that such appeal shall be heard to the owner and to the public agency.

In making its decision, the Board of Selectmen may affirm, modify, or revoke the Order of the public agency. The Board of Selectmen shall make findings to support its written decision, and a copy of the decision and the findings in support thereof shall be forthwith hand-delivered or mailed by certified mail, return receipt requested, to the owner and to the public agency by the Board of Selectmen.

If the Order is revoked, the proceedings shall be terminated. If the Order is affirmed or modified, the public agency shall proceed to enforcement, as affirmed or modified.

#### SECTION 13 ENFORCEMENT AND COURT PETITION:

If the owner fails to comply with an Order issued, affirmed, or modified pursuant to this Ordinance, the public agency may file a petition in the Hillsborough County Superior Court against the owner and may charge penalties as set forth under Section 15 of this Ordinance. Such petition shall set forth the reasons wherein the dwelling was found to be unfit for human habitation, as charged in the original complaint. In addition, the petition may contain additional allegations bearing upon the unfitness of the dwelling for human habitation and may contain a claim for penalties.

The public agency shall name in its petition, in addition to the owner, all mortgagees, persons in possession, and parties in interest, and the Court shall direct that notice be given to such parties.

Notice shall be given, where practicable and unless otherwise requested by personal service. Service may be made on any person residing outside the State of New Hampshire by registered mail, if so ordered by the Court. If persons having an interest in the dwelling have not been ascertained, then such persons may be given notice by publication of the petition in a newspaper having general circulation in the municipality, if so ordered by the Court. In the case of publication, such publication shall be made at least 10 days before the date upon which the parties named in the suit are to appear before the Court.

The matter shall be tried de novo at a date set for hearing by the Court, and the Court shall hear all pertinent and relevant evidence concerning the fitness of the dwelling for human habitation. If the Court finds in favor of the owner, it shall award reasonable costs and attorney's fees incurred in defending the petition in the Superior Court.

#### SECTION 14 ENFORCEMENT OF COURT'S ORDER:

The Court's Order shall be carried out by the public agency, if so directed, and any penalties assessed by the Court and costs incurred by the public agency in carrying out such Order, and the costs of such petition and enforcement including reasonable attorney's fees, shall become a lien against the real property, as to which such costs were incurred.

The lien shall be subordinate to all mortgages of record made prior to institution of a proceeding to foreclose such lien. The lien shall be filed at the Hillsborough County Registry of Deeds.

The lien may be foreclosed after the Hillsborough County Superior Court issues an Order directing same.

If the public agency is directed to demolish the dwelling, it shall sell the materials of such dwelling and pay the net proceeds of such sale, after deducting for costs of the sale, over to the Hillsborough County Superior Court, for distribution by it to such persons as the Court deems entitled to same.

#### SECTION 15 PENALTIES:

The public agency, in addition to filing a petition with the Superior Court to enforce this Ordinance and violations thereof, may assess penalties upon the owner for each day, after the owner fails to comply with the Order of the public agency or the Order of the public agency as affirmed or modified by the Board of Selectmen.

Such penalty shall be assessed in an amount not to exceed \$100.00 per day; and each day that the owner fails to comply with this Ordinance and the public agency's Order hereunder, shall constitute a separate offense.

#### SECTION 16 DELEGATION OF AUTHORITY:

The public agency may delegate any of its functions under this Ordinance to such officers, agents and employees as it sees fit. In making such delegation, the public agency shall specifically fix those duties to be performed by the appointed officers, agents and employees, as are deemed necessary to carry out the purposes of this Ordinance.

#### SECTION 17 NO ABROGATION OF EXISTING POWERS:

Nothing contained in this Ordinance shall be construed to abrogate, impair, or limit the powers of the Court, of the municipality, or of any municipal boards, agencies, or officers to enforce the provisions of its other ordinances, by-laws, rules or regulations, or to define and declare nuisances and to cause their removal or abatement.

#### SECTION 18 SEVERABILITY:

If any section, subsection, sentence, clause, phrase or other part of this Ordinance is for any reason held by a Court of competent jurisdiction to be invalid, such decision shall not affect the validity of the remaining

portions of this Ordinance.

SECTION 19 EFFECTIVE DATE:

This Ordinance shall be effective on the date immediately following Town Meeting Vote.

ARTICLE 49

To transact any other business that may legally come before this Town Meeting.
